May 1955

PREFACE

This paper is the result of a request to obtain information concerning the methods used by the Department of Defense to insure compliance with its directives. It was not intended that the subject be covered comprehensively. Consequently there are some areas which have been omitted or treated very lightly. The following paper is largely in the nature of a report of information gleaned from discussions with officials in the Office of the Secretary of Defense, to whom the author extends his appreciation for their wholehearted cooperation and objective evaluation of a controversial matter.

Since the paper is based mainly on interviews, and since referenced material is included in the appendices, no bibliography is included.

CHAPTER I

INTRODUCTION

Effective operations in any successful enterprise involve two basic actions: (1) the formulation and issuance by top management of policies and directives which govern operations, and (2) compliance with those policies and directives by subordinate groups or individuals. However, since there is great variation in interpretation and degree of compliance among humans, it is almost invariably necessary, as a corollary action, to institute some system for insuring that appropriate compliance is in fact being achieved. The purpose of this paper is to examine this area in the Department of Defense in relation to policies and directives issued by that department to the three military services.

To provide proper background for such a study, some knowledge of the development of the unification machinery is basic to understanding of the problem. Accordingly, the legal background together with the growth processes of the Department of Defense are briefly traced in chapter II.

The actions of the military departments are governed by a series of policy determinations, among which are:

(1) the Constitution;

(2) Acts of Congress;

(3) National Security Council Statements;

(4) Executive Orders;

(5) overall regulatory instructions of such governmental agencies as the General Accounting Office, Bureau of the Budget, Office of Defense Mobilization, other executive departments, and the Civil Service Commission; and

(6) Department of Defense Directives, Instructions and Memoranda.

Both by precedent of the first Secretary of Defense and by intent of Congress, the Office of the Secretary of Defense has intentionally remained small in comparison with the remainder of the military establishment, and no attempt has been made, or should be made, to build an organization which would reissue, interpret in detail, or formally implement the vast majority of requirements of superior authorities in the Defense Directives System. On the other hand, military departments are responsible to the Secretary of Defense for compliance with any requirements which may govern their activities.

As a general rule, therefore, the Secretary of Defense issues his own directives, instructions, and memoranda:

(1) when it is necessary to establish his own policies for governing and operating the Department of Defense;

(2) when governing requirements of superior authorities are insufficiently detailed or clear;

(3) when coordination of the three military departments

is necessary, either for relationships with outside agencies or for standardization of systems and procedures; and

(4) when it is necessary to interpret intent.

(Refer to Department of Defense Directive 5025.1 in Appendix II for details of the directives system.)

Compliance with directives in the Department of Defense is usually determined by use of one or more of three fundamental systems:

(1) The reporting system.

(2) The audit and inspection system.

(3) Budgetary and fiscal review and controls.

Each of these will be treated individually in chapters III, IV and V.

Any examination of systems for obtaining compliance would be incomplete without discussing some of the problems which create the need for such systems. On the other hand, so many factors operate to impede compliance that the proportions of this paper would fall far short of covering the subject in its entirety. The reasons behind inadequacies and lack of efficiency in various areas of the armed forces are the subject of recurring reports of investigative committees and groups. For comprehensive information of this sort, the reader should refer to the findings of such panels as the Flanders Committee, the Cooper Committee and the Hoover Commission. Points covered in Chapter VI of this

paper are those which were encountered in discussion of the day-to-day compliance problems of personnel in the Office of the Secretary of Defense.

Although this paper is approached from the viewpoint of the Department of Defense as a whole, consideration has been given to the fact that its content is directed toward comptrollership personnel. It will be noted, therefore, that discussions center mainly about directives emanating from the Assistant Secretary of Defense (Comptroller) and the problems of that office in obtaining compliance.

To facilitate reading and to shorten the overall length of this paper, the following abbreviations are used whenever appropriate:

DOD	Department of Defense
Sec Def	Secretary of Defense
OSD	Office of the Secretary of Defense
ASD	Assistant Secretary of Defense
OASD	Office of the Assistant Secretary of Defense
PRSD	Progress Reports and Statistics Division
EISED	Economic and International Security Estimates Division
(M&P)	(Manpower and Personnel)
(S&L)	(Supplies and Logistics)
(P&I)	(Properties and Installations)
Title IV	Title IV of the National Security Act Amendments of 1949
Cooper Committee	Advisory Committee on Fiscal Organization and Procedures, OSD
Flanders Committee	Preparedness Subcommittee #3, Committee on Armed Services, U.S. Senate, 83rd Congress
Hoover Commission	Commission on Organization of the Executive Branch of the Government

CHAPTER II

BACKGROUND

The Department of Defense was created and organized as a result of the National Security Act of 1947, as amended by the National Security Act Amendments of 1949 and Reorganization Plan No. 6 of 1953. Its purpose was

> . . . to provide for the future security of the United States through the establishment of integrated policies and procedures for the departments, agencies, and functions of the Government relating to the national security . . . . It was the intent of the Congress to provide three military departments, separately administered, for the operation and administration of the Army, the Navy. . . and the Air Force, with their assigned combat and service components; to provide for their authorative coordination and unified direction under civilian control of the Secretary of Defense, but not to merge them; to provide for the effective strategic direction of the armed forces and for their operation under unified control and for their integration into an efficient team of land, naval, and air forces . . . .[1]

The Secretary of Defense, as the principal assistant to the President for all matters relating to the Department of Defense, now exercises direction, authority, and control over all elements of the three subordinate military departments. How these powers were developed is one of the basic influences on the degree and manner of compliance demonstrated by military services in several important areas of endeavor.

One of the biggest historical issues connected with military departments has been the question of whether the civilian secretary really exercised control over the military service or

---

[1] Office of the Director of Administrative Services, Office of the Secretary of Defense, Brief of the Organization and Functions, Office of the Secretary of Defense (Washington, D. C. Department of Defense, May 1954), p. 1.

whether he was screened from an organization which reported to him only through a military chief of staff. Even in the Navy, where for many years there has been a customer-buyer relationship between operating forces under the Chief of Naval Operations and the bureaus and offices under the civilian secretaries, the Secretary has often been unable to grasp control of the service through lack of any real control over the means by which the Navy grew and operated. Prior to 1945, no service secretary could exercise effective control since he had little real voice in the seeking or distribution of appropriated funds. Accordingly, when James Forrestal became the first Secretary of Defense, he was armed with the first step in establishing actual civilian control over the military services, that of coordinating the budgets submitted to Congress. Subsequent secretaries have found comptrollership functions, including control of funds and development of statistics, to be of increasing importance to their effective administration of the Department of Defense. Robert A. Lovett (former Secretary of Defense) recently stated the following in hearings before a Subcommittee of the Senate Committee on Armed Services:

> In the first place, I do not believe a Secretary of Defense or the Secretary of any other department of the executive agencies can operate successfully without facts. The only way that I know of that he can get facts in the military establishments is through some sort of comptroller function, because his direction, authority, and control must be exercised largely, in my opinion, in that field.
>
> . . . . . .
>
> I think that the Secretary of Defense has a special necessity for the establishment of facts which he can rely on -

> that is, almost "audited facts." He cannot operate successfully without them, and it is an even greater need, I think, in the case of the military departments and their secretaries. He cannot operate unless he knows where he stands today - he does not know what he can do and he does not know what he needs unless he knows what his position is today.
>
> I emphasize this because inventory, in my opinion, is at the base of successful operation of the military departments and knowledge of inventory, knowledge of what you have, is a prime requisite. Based on that, you can then expand it into what is needed in a variety of circumstances.
>
> . . . . . .
>
> He must have an inventory. The only way that I know of that he can get that and have it adequately expressed is by a combination of physical inventory and financial statements; that is, a dollar price tag on many of the items.[2]

It is not intended to cover the complete history of development of control by the Secretary of Defense over the military departments. However, it should be noted that the extension of such control was a gradual process. As a result of the National Security Act of 1947, the National Military Establishment was established under a Secretary of Defense whose control was limited (except for budget control) to general direction and coordination of the activities of the military departments; Secretaries of the three services were permitted direct access to the President and Congress and could appeal questions over the head of the Secretary of Defense. Furthermore, the Secretary of Defense had an immediate staff limited to three special assistants with no legislatively defined authority to exercise policy control or to institute measures to insure compliance with his directives. Such a

---

[2]Hearings before the Preparedness Subcommittee No. 3 of the Committee on Armed Services, U. S. Senate, 83rd Congress, November 2, 3, 4, 1953 (U. S. Government Printing Office, Washington: 1954); p. 25.

climate invited open disagreement between the Secretary of Defense and the three services, and -- in general -- compliance with Sec Def goals and policies was placed on a basis of such cooperation as the Secretary of Defense with his very small staff could induce by persuasion. Partly as a result of these circumstances the National Security Act Amendments of 1949 were passed by Congress to extend the authority of the Secretary of Defense to authoritative direction, control, and coordination of the three services and to more fully subordinate the service secretaries and military chiefs to his authority. In addition, a Deputy Secretary of Defense was established to provide greater assistance to and coordination of the efforts of the Secretary of Defense, and the three special assistants were changed to Assistant Secretaries of Defense with assigned areas of authority and responsibility over policies affecting the three services. The responsibilities of the ASD (Comptroller) were legislatively defined in Title IV of the act. Reorganization Plan No. 6 of 1953 further strengthened the hand of the Secretary of Defense by changing various boards and offices to assistant secretaries of defense and by building up the status of the Chairman of the Joint Chiefs of Staff. It might be added that these changes also increased the compliance problems of the Secretary of Defense and the three services due to the increasing degree of central direction, complexity of control, reporting requirements, and interrelationships between the ten assistant secretaries and the military departments.

From the beginning of the unification venture, one of the basic philosophies was that the most important element of direction and coordination of the services was the control of funds appropriated by Congress. Under the National Security Act of 1947, the Secretary of Defense was given express authority to coordinate military budgets, but possibly due to the appeal powers of the military secretaries this control of funds lacked the decisive strength necessary to provide the substance of unification which Congress had intended. Title IV of the 1949 amendments, however, introduced mandatory adherence to the concept of performance budgeting and the possibility of attaining much more effective compliance by the services with the requirements of Sec Def, the President, and Congress. The Budget and Accounting Procedures Act of 1950 further developed the control of funds spent by government agencies, and the comptrollership concept has now, in fact as well as theory, developed into a principal means of insuring that the military services are complying with directives issued or passed on from higher authority by the Secretary of Defense.

CHAPTER III

THE REPORTING SYSTEM

Perhaps the most formal means of insuring compliance is to provide for submission of reports to requiring authorities. The Department of Defense has established a reports control system to monitor the licensing, review, and submission of all OSD reporting requirements except for a few minor one-time types requested by individual memoranda. This system is operated by the Reports and Control Standards Section, Office of Progress Reports and Statistics, in OASD (Comptroller) and presently involves four persons for the entire OSD.

Issuance of DOD Directives is controlled through the Administrative Secretary to Sec Def.[1] In the case of any directive which requires a report, PRSD is requested to check the requirement for the report and assign appropriate reports control symbols. Memoranda issued by Assistant Secretaries of Defense outside the directives system may request a one-time minor report without prior licensing. In cases where reporting requirements are issued without obtaining proper control symbols, the individual services usually catch the omission and, by agreement, inform the OSD reports control office -- partially as a check to insure that the requirement is properly authorized and partially to determine necessity for compliance. Most stray reports are thus eliminated.

---

[1] See Appendix II, Department of Defense Directive 5025.1

Upon being requested to license a report, the Reports and Control Standards Section conducts a review in the following steps:

(1) Determine that there is no unnecessary duplication with other reports or that data is not otherwise available.

(2) Determine why information of this type is needed.

(3) Determine whether and why all information is needed.

(4) Determine why the stipulated frequency of reporting is required.

(5) Check to see that instructions coincide with the form or format.

(6) Accomplish any changes brought about by discussion with the originator (clarity, definition, due date, etc.).

(7) Check on the economy of this or alternate reporting methods.

(8) See whether other offices need to coordinate data into the reporting requirement under study.[2]

No DOD Instruction presently exists covering reports and forms control. However, each quarter ASD (Comptroller) issues a memorandum to interested parties giving procedures for licensing new reports and forms and for discontinuing those for which a requirement has lapsed.[3] This memorandum indexes all approved

---

[2]See Appendix II, Department of Defense Instruction 4000.14, Paragraph I.

[3]See Appendix III, Index of Approved Office of the Secretary of Defense Reporting Requirements, dated 8 April 1955.

reports and forms, indicating frequency of submission; whether submitted by letter, form, or format; and reports canceled.

An annual inventory and review is executed by PRSD on all DOD reports, forms, and directives to cull out lapsed requirements, to determine new requirements, or to find possibilities for coordination. However, frequent reappraisals are conducted in specific areas, and the greatest amount of appraisal is accomplished in day-to-day business among the various offices of Sec Def and among reports and forms control offices of the military departments. An example of such appraisal exists at present in an ad hoc committee set up by the office of ASD (Supplies and Logistics) to determine reporting requirements which satisfy their needs. This involves representatives from reports control offices of both DOD and the military services as well as personnel involved in supplies and logistics. Such devices insure good reports control and tend to eliminate deadwood.

The control philosophy employed by PRSD is that reports and forms should be minimized and requirements should not be issued to the services until other sources of information are exhausted. Several examples of this philosophy are of interest:

(1) The burden of one-time reports is minimized in many cases by preliminary coordination with military departments to ascertain information which is readily available and means for obtaining whatever is required. By working together before a reporting

requirement is issued, interested personnel become acquainted with objectives, and requiring authorities do not issue demands which are impossible, too costly, or overly inconvenient to comply with.

(2) Various OSD offices may ask for information already available in other forms through PRSD. For instance, the recent National Reserve Plan submitted to Congress by ASD (Manpower and Personnel) carried fifty-three tables of personnel and budget information. Of these, thirty-seven were already available in PRSD, two in the budget estimates office, and only fourteen required joint preparation, thus relieving the services of additional burdens of reporting.

(3) If information desired is available at service headquarters, delays and printing expenses may be avoided by prescribing formats instead of specific forms. Formats instead of forms may also be prescribed in cases where OSD requires only part of the information presently submitted to service headquarters on their own forms. This eliminates much form-changing and overlapping.

(4) Reports may be required on a one-time or short-term basis, then terminated. However, prospects for future needs of the same information may still exist

at irregular intervals. In such cases, the services are directed to continue to maintain records sufficient to provide required data in the future at such times as may be requested.

(5) Attempts are made to coordinate the needs of military departments with those of the Department of Defense. This includes coordination of reporting due dates.

By such means the problems of Sec Def in obtaining information and the problems of military departments in complying are considerably eased.

Under a well-developed and executed reporting system, there is usually enough preliminary coordination and planning to avoid a great proportion of defaults due to lack of understanding or difference in interpretation, especially considering the fact that military department headquarters are within a few hundred feet of OSD so that telephones and personal contacts can easily be made to clear up gray areas. Consequently, it appears that the problem of compliance with reporting requirements is not one of compliance per se; rather it becomes a problem of timeliness and accuracy of reporting. In this respect again the telephone and adjacent office locations enable OSD to obtain fresh information in a very short time if needed in a hurry.

The reports control system does not cover budget or fiscal reporting. The reason given is that budget and control information are unique in that they are closely controlled in their own

right and therefore require essentially no outside control or coordination of criteria by reports control personnel. There is some difference of opinion on this point within the Defense Comptroller's office, however, and there are some who favor a coalition of fiscal and statistical reporting. It seems apparent that statistical reporting implies something different to these people than to those who favor the present system. As the system now stands, fiscal reporting already carries with it much of the pertinent statistical data which combines with or explains the dollar figures. On the other hand, the statistical information obtained by PRSD is frequently such that it cannot readily be expressed in dollars or gives a false impression to dollar figures unless examined as a set of separate facts. In any event, little duplication could be found in the present system and it appears that budgetary and fiscal operations might be further delayed by incorporation into the reports control apparatus.

To simplify compliance with Congressional requirements PRSD publishes, standardizes, and coordinates an annual list of reports required of DOD and the services by Congressional committees. These reports in many cases are incorporated into the Defense Directives System, and the Department of Defense has succeeded in legalizing this program through formal adoption by the Congress.

One important problem which arises in the reporting field is brought about by the centralization of authority in OSD. For

instance, Section 410 of Title IV provides for maintenance of property records in the military departments on a quantitative and monetary basis. Since the appointment of ASD (Properties and Installations) there have developed new requirements for reporting voluminous property data to his office.[4] Such circumstances emphasize the point that reporting requirements may be in danger of becoming overly rigid or too voluminous for the level at which reported. Personnel in OSD must constantly keep in mind that the services have different missions and that requirements cannot always be fully standardized without impeding operations. They must recognize that the military departments are operators whose requirements must in large part be determined by themselves. Sec Def may prescribe broad patterns but should leave the services essentially autonomous as prescribed by law.

---

[4]See Appendix II, Department of Defense Instruction 4165.14.

CHAPTER IV

THE AUDIT AND INSPECTION SYSTEM

In the previous chapter compliance was viewed in terms of reports which offer a ready means of providing facts and data from records available or from surveys made for a purpose. Audits and inspections, on the other hand, may involve administration, procedures, systems, organization, finance, and any other area which may happen to fall within their purview. In addition, audits may be used to validate reporting. It is not surprising, therefore, that audit has been termed the natural policing function to determine compliance.

Under the provisions of the National Security Act, Amendments of 1949 (Title IV), ASD (Comptroller) was assigned the following function:

> Sec. 401 . . . the Comptroller shall . . . establish and supervise the execution of . . . principles, policies, and procedures to be followed in connection with organizational and administrative matters relating to . . . internal audit.[1]

Development of this function was rather limited in the first four years under the 1949 law. However, with the investigations of the Flanders Committee in 1953 and the Cooper Committee in 1954 have come greater attention to the audit field, and it is probable that a positive program will be inaugurated during 1955. At present no formally expressed audit policy exists in the Defense Directives System; however, a "Preliminary Statement" on Department of Defense audit policies[1a] was issued by ASD (Comptroller) in January 1955

---

[1] Excerpt from Public Law 216, 81st Congress (National Security Act, Amendments of 1949, Title IV).

[1a] See Appendix III.

which, with minor changes, will probably be formalized in the near future. This policy does not provide for a single master audit agency reporting to the Secretary of Defense, but instead requires that internal audit (including contract audit) be established as a function reporting to the Assistant Secretary for Financial Management in each military department. Internal audit as conceived in this statement follows quite closely along conventional business lines. Audit activities would be prohibited in individual commands except for administrative examinations and "trouble shooters" for handling matters closely connected with day-to-day operations and housekeeping. Service Secretaries would be required to report the results of their audits to the Secretary of Defense through his Comptroller. Inspections of the type normally carried on by inspectors general would not be covered and would remain matters of internal service concern.

Already in operation is an annual reporting system summarizing the audit operations of the military departments. This report furnishes ASD (Comptroller) with information concerning time expended, work accomplished, workload, and audit results within each service, and is intended as an aid in planning and coordinating the DOD audit effort.[2] In addition, audit requirements may be stipulated as a provision of certain directives such as those concerning appropriation limitations, imprest funds, and project orders.[3]

---

[2]See Appendix II, Department of Defense Instruction 7600.1.

[3]See Appendix II, Department of Defense Instruction 7200.2 (Paragraph IX); Department of Defense Directive 7280.1 (Paragraph VI.B); and Department of Defense Directive 7220.1 (Paragraph XIV).

It should not be overlooked, however, that an active informal audit of sorts is continuously carried on by ASD (Comptroller) through investigations incident to budget and fiscal controls.[4] Another factor is that the Defense Comptroller, while limiting himself to audit policy rather than the actual mechanics of audit, exercises a form of audit control through approval of accounting, budget, and fiscal procedures promulgated by the military secretaries.[5] Compliance with proper procedures is subsequently determined by means of reports, controls, special audits and field inspections by OASD (Comptroller) personnel when the necessity arises, and by occasional spot checks. During the extended period of implementation of Title IV there is particularly close examination of systems and procedures to determine areas of compliance and non-compliance and to improve individual methods of achieving the aims of the act. Since the intent of Congress was to keep the services autonomous within the Department of Defense, the role of the Defense Comptroller as an audit policy-maker and coordinator rather than operating auditor appears consistent with the recent shift of the General Accounting Office out of the field of detailed audits of government activities.

Future developments appear to involve standardization of practices among the military departments and building their audit

---

[4]See Chapter V.

[5]See Appendix II, Department of Defense Instruction 7200.2 (Paragraph VII); Department of Defense Instruction 7210.1 (Paragraph VII); and Department of Defense Directive 7220.1 (Paragraph XVI).

staffs to a point where audits can be executed with reasonable frequency and completeness. Another development should be further coordination of audits and inspections within services so that overlapping, interference with operations, and resultant confusions are reduced to a minimum. At the present time these functions only partially meet standards of satisfactory performance, and determinations of compliance through audit can therefore assume only partial reliability.

CHAPTER V

BUDGETARY AND FISCAL REVIEW AND CONTROL

The degree of control exercised by the Secretary of Defense or of a military department was emphasized in Chapter II because the necessity for control implies a lack of conformity or compliance by subordinates with standards of performance which are acceptable to the civilian secretaries, the Congress, and the taxpaying public. Whether it be a matter of misinterpretation, a reluctance to conform or comply, or outright non-compliance through neglect or design, review and control functions are a primary day-to-day means of discovering and correcting malpractices in the military services. However, in an organization of the dimensions of the Department of Defense, a large amount of the control process must be delegated to the services. The Defense Comptroller exercises only general controls and is interested in fiscal reporting consistent with the extent of control which he can reasonably exercise. Most of these controls are reflected through appropriate use of apportionment, justification, and fiscal accounting reports.

The primary review, control, and interpretive functions are centered in the Budget Division, the Economic and International Security Estimates Division and, to some extent, in the Progress Reports and Statistics Division of the ASD (Comptroller). The major reports used for these purposes are listed as follows:

(1) Standard Form 131 and 131-A (Apportionment Schedule),

submitted as required by service comptrollers through ASD (Comptroller) to the Bureau of the Budget.[1]

(2) Standard Form 132 and 132-A (Reapportionment Schedule), submitted as required through the same channels as S.F. 131.[2]

(3) Standard Form 133 (Report on Status of Appropriation Accounts), submitted monthly through the same channels as S.F. 131.[3]

(4) Standard Forms 3a (Green Sheets, containing analysis of obligations by activity and object under each appropriation), together with supporting documents such as Summary Distribution of Personal Services, submitted by service comptrollers through ASD (Comptroller) to the Bureau of the Budget with each budget justification. (Green Sheets themselves are little used; primary interest centers in supporting documents.)[4]

(5) Justification Books, submitted by service comptrollers through ASD (Comptroller) to the Bureau of the Budget with Green Sheets, and to Congress with the President's budget request.

(6) DD Form 690 (Analysis of Appropriation Status by

---

[2] Ibid.

[3] Ibid.

[4] Ibid.

(5) [illegible] [illegible] [illegible]

Activity and/or Project), submitted monthly by service comptrollers to ASD (Comptroller).[5]

(7) DD Form 736 and 736-1 (Monthly Report on Status of Funds by Budget Category), covering funds available for obligation and funds available for expenditure, submitted by service comptrollers to ASD (Comptroller).[6]

To utilize the reports listed above, EISED develops a set of tables covering a great variety of fiscal information but broadly grouped into summary tables as follows:

(1) EISED 245 (Schedule of Apportionments and Reserves, by Appropriation Title).[7]

(2) EISED 247 (Obligations and Obligation Authority of Current General Appropriations, by Appropriation Title).[8]

(3) EISED 248 (Monthly Expenditures and Expenditure Availability, by Appropriation Title).[9]

(4) EISED 250 (Status of Funds by Budget Category).[10]

A brief discussion of the use of the above listed tables and reports is presented in subsequent paragraphs.

Review of the Budget. The submission and review of the Green Sheets and Justification Books in support of appropriations requests is a major initial check point for compliance with laws,

---

[5] See Appendix II, Department of Defense Directive 7250.3 (Attachment).

[8] Ibid.

[9] Ibid.

[10] Ibid.

regulations, and policy determinations. Conformance to guidelines and the direction of national effort can be ascertained and adjusted to bring about the most appropriate degree of balance in military potential.

The review process is the subject of extensive dissertations and official documents which need not be repeated here.[11] It is sufficient to say that budget reviews and controls are a major means of insuring military compliance with civilian aims and of insuring that military programs coincide with the means to finance them.

EISED 245. One of the principal budgetary controls is EISED 245 (Schedule of Apportionments and Reserves, by Appropriation Title), based on figures from Standard Forms 131 and 132. If figures in S.F. 131 or 132 are inconsistent with approved budget justifications and programs submitted to Congress, investigation is indicated to determine the reason (such as change in program composition due to new developments or changing circumstances). Such cases may result in either partial or complete rehearings of the revised budget plans by the Defense Comptroller and/or the Bureau of the Budget. On the other hand, investigations may be limited to informal conferences, depending upon the magnitude of questions arising.

---

[11] For development of the review process, the reader may refer to:

Mosher, Frederick C. Program Budgeting: Theory and Practice (New York: American Book-Stratford Press, Inc., 1954).

Smithies, Arthur. The Budget Process in the United States (New York: McGraw-Hill, 1955).

EISED 247. Probably the most important fiscal control is exercised through the use of EISED 247 (Obligations and Obligation Authority of Current General Appropriations, by Appropriation Title). This table is based upon information submitted in Standard Form 133. As a control, it is checked against DD Form 690 to determine whether there is agreement between obligations of appropriations in total and the various activities or projects conducted under these appropriations. For example, a recent comparison developed a $600 million imbalance in Army accounts supporting S.F. 133 and DD 690. To find the causes and malpractices which brought about this situation eventually required hundreds of telephone conversations and investigations into Army procedures, organizations, and interpretations in order to bring about agreement. It may be noted here that such policing is mandatory to bring about compliance or conformance, but that it may not always be feasible to go to such great lengths in areas where the cost in time and personnel efforts would exceed the benefit. Policing, therefore, is accomplished only if it appears that conformance would be desirable, and not with a view to achieving perfection.

The figures available in S.F. 133 and DD 690 will also indicate the degree to which programs estimated in annual budgets are being executed. Large demands of time and effort are involved in the investigation of variances and the suggestion of corrective actions.

EISED 248. EISED 248 (Monthly Expenditures and Expenditure Availability, by Appropriation Title), also based on information from S.F. 133, is a control table from which the Defense Comptroller can determine adherence to budget expenditure estimates. If imbalances occur between programs and expenditures, the Defense Comptroller invites the attention of the secretaries of the military departments or the Secretary of Defense to the problem, and may suggest possible courses of action or lines of correction. If circumstances warrant, the Defense Comptroller may conduct an investigation into causes and remedial action for purposes of recommending solutions to officials in the operational chain of authority. EISED 248 and its subsidiaries are also used for purposes of reconciling Department of Defense and Treasury Department expenditures accounts in order that the Treasury Department may provide appropriate debt funding and cash reserves for disbursement.

EISED 250. Another device of great importance in fiscal control is EISED 250 (Status of Funds by Budget Category), which is compiled from DD Forms 736 and 736-1. Through this control device, functions of the services are broken down into categories which lend themselves to comparison of similar activities and development of total defense costs in related fields. For instance, transportation costs in the Army may be compared with costs in the Navy, and the total expenditure for Department of

Defense transportation can be accumulated. Comparisons can be made concerning combat vehicles, direct and indirect costs of research and development, public works efforts, and relative emphasis between major procurement and operations, to mention a few. A further development of the budget category mechanism is the gradual standardization of military appropriation titles and the accounting systems set up under them. Budget category breakdowns will probably also bring about standardized accounting symbols within and among the military departments, thus facilitating the development of budgets, comparison of costs, and control of similar activities or projects.

Review of Apportionments and Reapportionments. A good example of controls which may be exercised in the review of apportionments is the Standard Form 132A which covers apportionments for certain types of project work. Upon submission, these forms are accompanied by "Footnotes," supporting data which provides the justification for the item requested. By use of this form and its attachments, approving authorities can check (1) agreement of related accounts; (2) legal basis for the expenditure and for the project; (3) comparison of total amounts requested for the project and total funds available; (4) the current estimate of cost for the project; and (5) the effect of apportionment transfers. A comparison can also be made with form DD 690 (Analysis of Appropriation Status by Activity and/or Project) to determine

whether or not the project requested is in conformance with the remainder of the program for the installation. Not all of these are habitually checked at the Department of Defense level, since their primary interest is in the status of obligations and expenditures, and the military departments can usually be depended upon to take care of many of these control checks themselves. On the other hand, it may happen that a reapportionment request will be of such significance or will represent such an alteration of previous plans that a complete hearing and rejustification will be required at the Department of Defense and/or Bureau of the Budget level.

Several other controls of lesser importance are used for checks on reimbursements, MDAP funds, the workings of stock funds and industrial funds, and relative costs between fiscal years, to mention a few.[12] From all such controls, useful information can be extracted from figures which on the surface may seem perfectly acceptable. It is difficult to describe any exact technique which is used in all cases in uncovering non-compliance. It is said that most errors of compliance are developed as a result of a "seat of the pants" sixth sense which sounds a mental alarm when one set of figures is inconsistent with another. When inconsistencies are developed, field inspections by the budget staff frequently are the result. The Defense Comptroller's budget and fiscal staff spends up to half its time on the road lending large

---

[12] See Appendix II, Department of Defense Directives 2110.5 and 7230.2 and Appendix III, Regulations Covering the Operation of Management Funds.

ears and eyes to a concept of eternal vigilance toward economic use of funds and resources. The principle involved is that it is healthy for staff personnel to visit operational areas to exchange views, increase understanding, and to motivate cooperative relations between the line and the staff. There is a general repugnance to the "ivory tower" directive approach in the Defense Comptroller's office. Usually field inspections cover specific areas of considerable significance, but occasionally members of the staff are sent out on general inspection tours to become acquainted or reacquainted with field operations. By means of these recurring field trips, staff personnel learn the problems and peculiarities of combat activities and their supporting forces. As a result, directives and policies emanating from OSD can be formulated or corrected to fit combat necessities, interpretation of policies can be checked and standardized, and the aims of Sec Def can be made better understood. In contrast to this practice, it is understood that OASD (Supplies and Logistics) tends to issue directives, sit back, and await compliance, apparently not fully aware that such a huge organization as the Department of Defense requires determined follow-up through lower echelons to insure uniformity of interpretation and compliance.

Though much can be determined from reports and audits, there is often considerable delay in obtaining results; review and control functions, therefore, can be considered one of the most effective and timely methods of insuring compliance with Sec Def aims.

CHAPTER VI

PROBLEMS IN COMPLIANCE

In any enterprise as widely dispersed as the Department of Defense the achievement of satisfactory compliance with directives is not only fundamentally important to attainment of objectives but is difficult to insure. Considerable evidence of success in this field has been demonstrated by our military, logistic, and organizational accomplishments over the last fifteen years; without intelligent implementation of directives under able coordination at key points, such success would not have been achieved. The basic desires inherent in most people to perform their functions well and to be highly regarded by their associates constitute strong contributing forces to attitudes of conformance and cooperation with directives and policies evolved to guide them. On the other hand, compliance may be subject to a complexity of physical and human obstacles. The paragraphs which follow, while not purporting to cover the field, will at least present some of the major difficulties encountered by OSD in carrying out its responsibilities.

Interpretation

One of the most significant factors in compliance is uniformity of interpretation. Efficacy, clarity, and completeness of directives is an ever present objective but is often found extremely difficult to attain without sacrificing brevity and generality to profusion of detail and consequent rigidity in means of compliance. While various mechanisms such as reports, controls, standardization of systems and procedures, and audits are employed to verify and obtain uniformity, they are frequently insufficient and too expensive to probe all extremities of the vast defense establishment.

Through the multiplicity of layers of authority and delegation, there is a natural and appropriate tendency to interpret and amplify directives from higher authority in the light of local circumstances; yet in spite of attempts to improve understanding, inevitably there develop many cases of diluted force or significantly altered interpretation by the time directives reach lower echelons. Furthermore, the very diversity of effort, indoctrination, and environment of the various phases of defense endeavor causes different approaches to the same requirements. Though most groups are confident that they are reacting properly, they may be accomplishing entirely variant translations of directive to action because of their basic beliefs and surroundings. To help overcome at least a part of these problems OSD utilizes field inspections, salesmanship, and educational techniques to achieve a greater community of common interpretation.

Even though competent men carry out a directive with the best of intentions, they may frequently bring about inadequate or incorrect implementation through lack of understanding of the purpose behind it. To overcome this obstacle, OSD has found considerable advantage in extending directives to include liberal discussions of philosophies and purposes behind them. Not only does this result in more adequate interpretation, but personnel are usually found to have more cooperative attitudes toward compliance.

Difficulties of interpretation do not, of course, always develop through failings of subordinates. Although great efforts are exerted to insure proper evolution of requirements, the requesting authority may not know precisely what he wants; poor formulation, technical inadequacies of directives, and defective policy definition may bring about correspondingly poor response. Proper interpretation is also a matter of communications. Considerable effort is expended in field inspections, in conferences, and in developing directives themselves to insure minimum variances and to promote mutual understanding. However, OSD has a small force to cover a large area; to assist them, they must depend on adequate leadership in the military departments.

Leadership

One of the most obvious factors in achieving satisfactory compliance is adequate leadership. The acumen, capacities, determination, and moral character of persons in responsible positions are of utmost importance to the proper implementation of directives. By and large the qualifications of most personnel in such positions are excellent, and under most circumstances they fulfill their responsibilities with credit. As is the case in any large organization, however, there are instances wherein leadership has not been adequate to accomplish DOD objectives.

Among the more difficult leadership situations are lack of understanding, abdication of responsibility, resistance or obstruction, and lack of courage or determination to attempt or carry through new concepts. Although lack of understanding of purpose was previously mentioned in relation to interpretation of directives, this factor is also a characteristic of personnel who have not developed broad attitudes of cooperation or who do not comprehend the magnitude and related effects of the objectives which DOD Directives seek to achieve.

As previously stated, most individuals attempt to carry out their responsibilities to the best of their capabilities and understanding. Abdication of responsibility is not usually intentional. Nevertheless, it is not entirely infrequent. On some occasions, the exercise of responsibility may be beyond the capabilities of individuals so charged. Conversely, other individuals

may be aware of the means but may not utilize authority or facilities commensurate with the importance of requirements made of them. Abdication may further manifest itself in the failure to correct or recommend corrective action for obvious deficiencies or in failure to adequately check upon the efforts of subordinates and provide proper direction within means available. For example, cases have been encountered where a senior approved a document merely on the basis of sighting appropriate subordinates' initials thereon, only to find subsequently that, through failure to make reasonable checks, he had approved actions quite inconsistent with basic policies or directives of higher echelons.

Resistance to compliance is a problem which is usually denied in all quarters but which actually does develop toward certain directives. It can perhaps be said that resistance is usually the result of strong feelings of righteousness on the part of those resisting. Ulterior motives, though occasionally occurring, are not prevalent. The degree of resistance may vary from a mere psychological opposition to change to an organized movement for obstruction. Though outright obstruction is by no means general, it arises on occasion in several forms, such as pressure tactics by sympathy groups, misplacing directives, according low priorities to particular changes, or setting up ineffective systems for compliance. It is almost inevitable that any directive which effectively reduces the prerogatives, power, or position of individuals or groups will meet with some sort of obstruction or

resistance. Honest differences of opinion may develop not only variations of interpretation but strong reluctance to negotiate or compromise. Another difficulty arises wherein subordinates are reluctant to comply with requests for information because of some fear that the information might be incorrectly interpreted or used in a manner detrimental to their interests.

Resistance to change may also derive from mere reluctance to alter the status quo or from an actual fear to tread the road into the unknown. This has occurred, for example, in connection with certain efforts to establish industrial funds and stock funds, which are concepts quite new to many military men. Again in the case of resistance, the causes do not always lie with the services. If OSD fails to coordinate the requirements of two or more OSD agencies, unreasonable demands may be imposed upon the services and bring about justifiable reluctance to comply.

In general, it may be said that OSD does not consider inadequacies in leadership to be a major problem in lower field echelons. Most of their difficulties are reported to involve headquarters staffs in the Pentagon and major command staffs in the field. It should not be inferred that such conditions are general or that we cannot have full confidence in the abilities of such personnel to perform operational tasks well. The point to remember is that OSD is an agency set up to direct, coordinate, and control the military departments with the best attainable

economy and efficiency. Opinions concerning the methods and means vary as considerably as do the abilities to accomplish the objectives. It is to be expected that even approximate perfection is a goal which is probably not attainable. Solution to the problems of leadership will probably never be fully reached. However, with growing education in business management concepts, continued improvement of selection processes for high positions, and the gradual emergence to top echelons of a younger generation indoctrinated in unified armed service effort, there will undoubtedly develop greater compatability between the objectives of OSD and the various services.

Characteristics of the Defense Establishment

The tremendous size and geographical extent of defense activities have a decided impact on the ability to obtain compliance with directives. Although the proximity of service headquarters to OSD facilitates implementation at the top, considerable delays are encountered in obtaining satisfactory results in lower echelons because of the expanse and diversification of service functions. In spite of its size, numbers of personnel and facilities are often limiting factors on successful compliance. For instance, the inability to obtain adequately qualified comptrollership personnel has seriously limited the early attainment of the objectives of Title IV. Personnel ceilings, of course, are partially the cause, but it should be noted that ceilings on OSD personnel also have had a perhaps desirable effect of restricting requirements which they can place upon the services.

The time required to obtain information may render much reported information obsolete by the time it reaches OSD. Extensive use of telephones, messages, and conferences is necessary to keep current and to disseminate information with some degree of uniformity. Education of many thousands of people with varying backgrounds and training of leaders with necessary breadth of understanding and vision are both very time-consuming. The problem, therefore, is not necessarily one of compliance per se, but of the time it takes to obtain desired results.

A particular problem haunting several OSD personnel is

termed "the shortstopping of DOD Directives at military headquarters." DOD Directive 5025.1 states that

> . . . . Policies, instructions, and orders promulgated through the Department of Defense Directives System . . . will be effective on the respective dates therein stated, without alteration, amendment, paraphrase, or change, throughout all component elements of the Department of Defense . . .[1]

OSD personnel consider that this requires dissemination throughout the services in the original form; however, they observe that DOD Directives are usually not forwarded to subordinate elements, but are retained at headquarters and interpreted in their own language, thus delaying dissemination and compliance.

Civilian secretaries (including under and assistant secretaries), although well qualified in the business world, frequently require extended periods of indoctrination before becoming acquainted with Washington customs, the problems of military operations, and the perspective of their new environment. In addition, their turnover rate is high. Intelligent implementation of Sec Def policies thus becomes a slow procedure even at the highest levels and is subject to considerable pressures from various groups in the process. Unfamiliar with all facets of his new position, a civilian secretary must lean heavily on advice from professionals. Should he be ill-advised, the objectives of OSD may suffer serious delays or set-backs. On the other hand, the infusion of civilian business talent into defense operations helps insure that military endeavors are kept in conformance with the nation's capacities and its goals.

Summary

Though the problems are many, progress is being made. Considerable effort goes into development of reasonable requirements at the OSD level, and in many respects the services have been brought more into line with the concept of unified effort. With gradual education of the services in modern management practices is coming progressively improving compliance with OSD policies. It would be a mistake, however, to assume that the military departments have given up much of their individuality; while gradually accepting more business-like methods, there is not always a free willingness to conform to a given pattern. Of course a certain degree of disagreement should be regarded as a healthy sign of democratic interchange of ideas and undoubtedly is to be encouraged. On the other hand, one may ask whether the introduction of new directives and instructions should require such a large measure of policing and negotiation to obtain the desired response.

Since the advent of the National Security Act of 1947, the majority of DOD Directives have dealt with coordination of matters common to the services and with direction and control of military departments under the Secretary of Defense, particularly in financial matters. There is still some measure of chafing, however, among leaders of the military departments toward control and direction of the Secretary of Defense. Unification is not yet a wholly accepted concept among senior military officers. Quite naturally, this partial acceptance is reflected in compliance with

directives. With the development of a younger generation of military leaders, it is conceivable that a group of men brought up in an atmosphere of complementary endeavor may bring about a spirit of greater harmony than exists in some areas today. Even without this help, the passage of time will undoubtedly show improvement with practice. As a result, both compliance with DOD Directives and the systems for insuring compliance should continue to develop into more freely cooperative functions.

Compliance problems undoubtedly exist in greater scope than have been presented. However, those discussed represent major difficulties encountered by OSD personnel.

Discussion of reporting, auditing, reviews, and controls should be considered only as a general summary of the systems for insuring compliance. All of these systems are undergoing continuous processes of evolution designed to render more effective service to the Secretary of Defense and his assistants. However, it is further emphasized that these systems are aimed not only at insuring compliance with directives, which is the limited scope of this paper, but at the greater objective of assisting military departments and higher authority in the cooperative effort toward greater economy and efficiency in the Department of Defense.

APPENDIX II

NUMBER 1400.3
DATE 3 November 1954

Department of Defense Instruction

SUBJECT Monthly Report of Compliance with the Statutory Graded Civilian Personnel Ceiling (DD-M&P(M)43R1

References: (a) Current Defense Appropriation Act
(b) Directive No. 1400.2, 21 Nov 1951, "Application of Ceiling on Graded Civilian Employees."
(c) Directive No. 1400.3, 22 Jan 1952, "Monthly Report of Compliance with P.L. 179 Graded Civilian Personnel Ceiling (DD-M&P(M)43)"

I. PURPOSE

The purpose of this Instruction is to establish recurring reports to provide information (1) to assure Department of Defense compliance with the statutory graded civilian employment ceiling, and (2) to assure that the military departments and the Office of the Secretary of Defense each hold graded civilian employment to levels permitted by their assigned portion of the ceiling. The Office of the Secretary of Defense will consolidate this information for the entire Department of Defense and will inform appropriate Congressional Committees of compliance.

II. CANCELLATION

Reference (c) is hereby cancelled.

III. GENERAL REPORTING PROCEDURE

It is requested that the Secretaries of the military departments and the Director of Administrative Services, OSD, each arrange to furnish the Progress Reports and Statistics Division, Office of Assistant Secretary of Defense (Comptroller) with a Monthly Report of Compliance with the Statutory Graded Civilian Employment Ceiling (format attached). An original and one copy of the report should be submitted within 30 days following the close of the month being reported. The first report based on 31 October graded employment will be due 1 December 1954. Report Control Symbol DD-M&P(M)43R1 is assigned to this reporting requirement.

IV. COVERAGE

The Monthly Report of Compliance with the Statutory Graded Civilian Employment Ceiling will supplement the official report of civilian employment, Standard Form 113, and insofar as possible will be keyed to the definitions, concepts, and categories established for that report. Full-time employees reported will represent the number of such employees on the rolls on the last day of the month. The number of intermittent employees (those described as "consultants" or those who are compensated on a "when actually employed" basis) reported for the month will represent the number who worked at any time during the month. Scheduled part-time employees will be reported in terms of man-months (full-time equivalent basis).

V. SPECIFIC ENTRIES

The specific entries to be reported are shown in the attached format, and are defined in detail, as follows:

Line I, Total Graded Employees (under Department's supervision). Enter the sum of (a) employees occupying positions subject to the Classification Act of 1949 (measuring part-time employment in man-months instead of number of employees as on SF 113), (b) consultants and other intermittent employees who worked at any time during the month and who are employed on a contract basis or paid on a per diem basis, and (c) those employees working without compensation who submit expense vouchers for reimbursement of expenses incurred as a result of their gratuitous services. (The current Appropriation Act provides that persons employed without compensation shall be charged against the ceiling limitation if they are reimbursed for expenses.) Category (a) above will exclude indigenous personnel and foreign nationals occupying Classification Act type positions in overseas areas.

Line II, Graded Employees of Other Agencies. Enter the number of graded employees who are under the direct supervision of Federal Agencies outside the Department of Defense but whose services are paid for from funds made available by the Military Department through allotments, advances, transfers, or reimbursement. This figure may be obtained each month from the Federal Agencies concerned or the Military Department may summarize the data presented

in the Appendix to its annual budget which shows an estimate of both the number of permanent positions and average number of employees involved in such shifts of funds; using the estimated number of graded employees in the latter of those two to be paid from the appropriate Titles, as its entry for this item. If the figure reported is an estimate, it should be so labelled on each report.

Line III, Total. Enter the sum of the entries on lines I and II.

Line IV, Graded Employees Excluded from Ceiling. Enter the sum of the figures shown on lines 1 through 6, which provides a breakdown of graded employment excluded from the ceiling. The entries on lines 1 through 5 should account for all graded employees paid for personal services from funds other than those appropriated in the current Department of Defense Appropriation Act. The entry for line 6 should account for exclusions under Section 720, Department of Defense Appropriation Act, Public Law 458. Funds appropriated in the applicable Titles of the current Department of Defense Appropriation Act are deemed to include prior-year carry-overs.

Line IV - 1 through 3. Self-explanatory.

Line IV - 4, Funds provided by other agencies. Enter the number of employees paid from funds made available from other sources such as allotments, advances, transfers, or reimbursements from agencies outside the Department of Defense to any agencies in the Department of Defense.

Line IV - 5, Other Funds. Enter the number of graded civilian employees not reported on lines 1 through 4, and who are also excluded from the ceiling limitation. Any entry on this line should be accompanied by the appropriation identification; if more than one appropriation is involved each appropriation should be reported by brief title similar to those shown in the attached format.

Line IV - 6, Civilians Substituted for Military. Enter the number of graded civilians who have been substituted for military personnel in accordance with provisions of Section 720 of Department of Defense Appropriation Act of 1955, Public Law 458.

Line V, Graded Employees Subject to Ceiling. Enter the difference between the figures reported on Lines III and IV. This is the number of graded civilian employees paid from funds appropriated in the applicable Titles of the current Department of Defense Appropriation Act.

Line VI, Current Ceiling Allocation. Enter the total number of graded civilian spaces allocated by the Assistant Secretary of Defense (Manpower and Personnel) for the applicable month covered by each Monthly Report of Compliance with the Statutory Graded Civilian Employment Ceilings.

Line VII, Over (+) or Under (-) Ceiling. Enter the amount by which the Line III entry exceeds, or is less than, the line IV entry.

Department of Defense Directive

SUBJECT Report of Status of Available Funds under MDAP (DD-MDAP(M)2R2)

I. PURPOSE

The purpose of these instructions is to prescribe uniform procedures for reporting on the status of funds made available to the Department of Defense to carry out its assigned responsibilities under the Mutual Defense Assistance Program. It is not the intention of this directive to change in any manner the basic accounting records currently being maintained by the three Services. Report Control Symbol DD-MDAP(M)2R1 is hereby cancelled.

2000

II. RELATED DOCUMENTS

This document is in agreement with the principles outlined in Section V, Financial Reporting by Participating Agencies, of FMACC approved paper DD-9/15 "Funding and Reporting Procedures for MDAP" dated 5 June 1950. Any portions of previously approved FMACC papers in conflict with this document are rescinded or amended.

III. REPORTING INSTRUCTIONS

Attached are instructions covering the requirements for monthly reporting on Status of Available Funds. All questions regarding the execution of the reports should be referred to the Office of Progress Reports and Statistics, OSD,

Report Control Symbol DD-[illegible]DAP(M)2R2 has been assigned. A supply of the forms should be requisitioned by each military department from its Forms Control Officer.

Department of Defense Instruction

SUBJECT Department of Defense Financed Production Expansion Projects (DD-Comp(SA)174)

I. PURPOSE

The purpose of this Instruction is to prescribe reports on the progress of and the future plans for projects for the expansion, conversion, and modernization of industrial facilities (i.e., structures and production equipment) that have been or are to be financed with Department of Defense funds.

This report is required by the Office of the Assistant Secretary of Defense (Comptroller), OASD (Supply and Logistics), OASD (Properties and Installations) and the Office of Defense Mobilization, and the Bureau of the Budget for planning and guidance, and to provide a basis for reports to the Congress.

II. CANCELLATION

4000

DoD Directive 4000.14, "Department of Defense Financed Production Expansion Projects (DD-OC(SA)70)", 22 Dec 52, is hereby cancelled.

III. APPLICABILITY

Reports will be submitted semi-annually by the Departments of the Army, Navy and Air Force to the Office of the Assistant Secretary of Defense (Comptroller).

IV. REPORTS REQUIRED

A. Coverage

1. Instructions for the preparation of this report and a copy of the form to be used--DD Form 685--are attached. These instructions have been revised to simplify reporting by the elimination of some requirements heretofore included. In order, however, that the form of report may be used by a military department for its own purposes, DD Form 685 retains substantially the columnar arrangement previously specified.

Entries are not required in all columns, but complete reporting of the data called for in the attached instruction is required. Reporting in greater detail may be required by departmental headquarters for their own use.

2. For the purpose of this report, Department of Defense funds are considered to include appropriations received after 1 July 1950 by the departments or by the Secretary of Defense for allocation to the departments for industrial expansion projects. Specifically included, in addition, are requests for appropriations transmitted by the President to the Congress.

3. Nine (9) legible copies of the report required by this Instruction will be prepared on the prescribed form and submitted to the Assistant Secretary of Defense (Comptroller), Attention: Progress Reports and Statistics Division.

4. The first report under this Instruction shall be as of 31 August 1954, and shall be submitted on or before 30 September 1954. Subsequent semi-annual reports shall be made as of 28 February and 31 August of each year and shall be submitted within 30 days after the close of the reporting period. As provided for in the attached instructions, a department may submit at its discretion, in lieu of a complete semi-annual 28 February report, an abbreviated report showing only the changes which have occurred since the prior 31 August submission.

B. Classification

The report shall be classified no higher than SECRET, and the required information shall be shown for all projects classified SECRET or less. For any projects classified higher than SECRET, the description of the product in Column e shall be omitted and the words "TOP SECRET" inserted.

V. REPORT CONTROL SYMBOL

Report Control Symbol DD-Comp(SA)174 is assigned to the reporting requirements of this Instruction.

VI. IMPLEMENTING INSTRUCTIONS

Two copies of implementing directives issued by any of the departments in connection with the report will be forwarded, upon distribution, to the Assistant Secretary of Defense (Comptroller), Attention: Progress Reports and Statistics Division.

W. J. McNeil
Assistant Secretary of Defense (Comptroller)

Department of Defense Instruction

SUBJECT Inventory of Military Real Property (DD-P&I(SA)142)

REFERENCE: (a) Department of Defense Directive No. 5131.1, "Responsibilities of the Assistant Secretary of Defense (Properties and Installations)", 13 August 1953

I. PURPOSE

The purpose of this instruction is to provide uniform procedure for the establishment and maintenance of an inventory of real property (land and/or improvements), and for the preparation of an abridged inventory in summary form, for use by interested offices of the Department of Defense.

II. APPLICABILITY

This instruction applies to all real property under the control of the military Departments except property in an officially designated combat zone, and river and harbor and flood control property under jurisdiction of the Secretary of the Army. Property in National Industrial Reserve and property disposed of subject to right of recapture or National Security Clause will not be included unless such property is under military control.

III. INVENTORY AND INVENTORY SUMMARY DATA

The inventory is to be a basic source of information for reports of status, cost, capacity, condition, present use, maintenance and management of the real property of the military Departments. The inventory summary is to be a reference and a source of current comparable information pertaining to such real property for use in developing and effectuating Department of Defense policies, plans and programs. The inventory and the inventory summary will be established and maintained in accordance with Inclosure 1, "Instructions".

IV. SCHEDULE OF ESTABLISHMENT AND REPORTING

Each of the military Departments will maintain the inventory in an office of record at its Washington, D. C. headquarters where it will be available to the Staff elements of the military Departments and of the Secretary of Defense for reference. The data contained in the inventory will be revised each quarter to reflect additions, deletions and changes made during the quarter. The initial inventory will be made as of 1 January 1954. Copies of the inventory summary prepared by each military Department will be furnished the Secretary of Defense, each Assistant Secretary of Defense, and

the Secretaries of the other military Departments in addition to such other distribution as may be required. In addition, a copy of the inventory summary will be furnished to Congress to meet the reporting requirement of Section 410 of the National Security Act, as amended, and a copy of that portion of the inventory summary relative to installations located in the United States will be furnished to the General Services Administration. The initial issue of the complete inventory summary will be distributed on or before 15 November 1954. Revisions in the inventory will be reflected in subsequent issues of the inventory summary which will be prepared and distributed within 60 days after 31 December and 30 June of each year.

V. REPORTING AGENCIES

The inventory summary will be prepared and distributed by each military Department. The Department of the Navy will be responsible for reporting Marine Corps facilities.

VI. IMPLEMENTING INSTRUCTIONS

The implementing instructions prepared by each military Department will be submitted to the Office of the Assistant Secretary of Defense (Properties and Installations) for prior approval before publication.

VII. PROPERTY ACCOUNTING

The inventory of real property to be maintained by the military Departments shall be considered to be property accounting records as required by Section 410 of the National Security Act, as amended. The Assistant Secretary of Defense (Comptroller) will provide assistance in the development of accounting systems related to these records. As rapidly as feasible these records shall be placed under accounting controls in a manner which will assure accounting accuracy and provide integration between the inventory changes and the financial transactions involving real property as recorded in the appropriation and fund accounts of the respective departments, however, this will not be interpreted to permit delay in establishment of the inventory.

VIII. REPORTS CONTROL SYMBOL

Reports Control Symbol DD-P&I(SA)142 is assigned to the inventory summary.

IX. GENERAL

Questions of interpretation or applicability of this instruction should be addressed to the Office of the Assistant Secretary of Defense (Properties and Installations).

Franklin G. Floete
Assistant Secretary of Defense
(Properties and Installations)

Inclosure

INSTRUCTIONS

I. These instructions are to provide detailed information and guidance relative to the real property inventory and inventory summary. The existing records should be utilized as much as possible. However, such records must be accurate. Any additional information required by the military Department concerned may be included in the inventory.

II. Definitions - as applied to the inventory and inventory summary:

A. Permanent Building Construction is defined as that which produced a building suitable and appropriate to serve a specific purpose for a maximum period of time (at least 25 years) and with a minimum of maintenance.

B. Semi-Permanent Building Construction is defined as that which produced a building suitable and appropriate to serve a specific purpose for a limited period of time (less than 25 years and more than 5 years) and with a moderate to high degree of maintenance.

C. Temporary Building Construction is defined as that which produced a building suitable and appropriate to fill a need for a short period of time (five years or less) without regard to degree of maintenance, and the designs and details of which provided minimum facilities with maximum initial economies.

D. Gross Floor Area (sq.ft.) is defined as the total area of all the floors extended to the normal outside face of the building wall including basements but excluding unusable attic space.

E. Space Volume (cu.ft.) is defined as the actual cubic space inclosed within the inner surfaces of the outside or inclosing walls and contained between the inner surfaces of the structural members (roof, trusses, rafters, or ceiling, whichever is lower) and the finished surfaces of the lowest floors.

F. Installed Personal Property is defined as those items of accessory equipment and furnishings, including materials for installation thereof, which are required for operation and affixed as a part of the building or facility such as: fixed overhead crane-runways; elevators; lavatories; plumbing, heating, ventilating, cooling, electrical and sprinkler systems. Machine tools and production equipment will not be included.

G. Installation is the real estate together with the improvements thereon acquired or constructed for a camp, post, station, airfield, hospital, depot, arsenal, etc. Many separate functions designated as activities may be carried on at a designated installation.

III. Inventory

The inventory prepared and maintained by each military Department will include: every item of real property and real property improvement owned, leased, or otherwise acquired and controlled by the military Department, including property and improvements acquired from other Departments and Government agencies. The military Department having management responsibility for a joint installation or leased facility will be responsible for preparing and maintaining the inventory of such installation or leased facility. Each item of an installation will be accurately and clearly described, and identified with the pertinent category code number appearing on Attachment 1, "Categories of Facilities". The data required for leased property which is not used as all or part of an installation is set forth in paragraph III. B. The inventory will be maintained in a current status and in such a form and manner as to support directly the summary prescribed in paragraph IV.

A. The inventory will include the following data for each installation: (In the case of an installation located in the United States which is situated in more than one state, a separate report will be made for portion of installation located in each state)

1. General Information

a. Name, command and geographical location (county or parish for the headquarters of the installation in Continental United States. Also name all other counties or parishes in which an installation in the United States is located), state, District of Columbia, country, territory, possession, distance and direction from nearest city or town of not less than 10,000 population together with name of nearest city or town.

b. Type and status of installation. Report whether it is a permanent or temporary type installation. Also report whether it is in an active, inactive or standby status.

c. Date initially occupied by a military Department, i.e., first date of occupancy for military use in case of installations remaining continuously under military control. If installation disposed of by Government and reacquired, show date of such reacquisition.

d. Principal function, and/or product. Report mission of a non-industrial installation and product of an industrial installation.

e. Name of contractor-operator for industrial facilities under military control which are being operated by private contractor for the military Department.

f. Number of airfield runways.

2. Installation Cost

   a. Total cost of all real property (land and improvements) comprising installation owned by the military Department, exclusive of value of property leased for military use and property acquired for temporary use by license, permit, executive order, public land order, territorial order, and recapture (national emergency use provision).

3. Land - Data on land comprising an installation will include:

   a. Number of acres under military control, cost to the Government, annual rental, or other consideration paid for the land and buildings, in each category (see Attachment 1). Exclude cost of land acquired by license, permit, executive order, public land order, and territorial order.

   b. Number of acres, in each category, not being used for any purpose (exclude acres that are partially utilized).

   c. Number of acres, in each category, used by other Government agencies, State or local Governments, and by private enterprise for non-military use, and annual rental received for such use.

   d. Appraised or estimated value of land and improvements leased for military use (exclude improvements owned by United States Government).

   NOTE: ~~For installations in the United States, its Territories and Possessions, use categories 9510 to 9557, inclusive. For installations located elsewhere, use categories 9560 to 9566, inclusive. (See Attachment 1)~~

4. Buildings and Facilities, Including Utilities - Data on individual buildings and facilities in existence (excluding buildings and facilities under construction for which accountability has not been transferred from construction agency) will include:

   a. Assigned (station) identification number, category (see Attachment 1), and type of construction - permanent, semi-permanent, or temporary (see Definitions). The category will be determined by use for which it was designed or permanently converted. This information should be established in a manner that will make it possible to compute number of buildings in each category and type of construction at an installation for the inventory summary.

b. Area (gross floor area) for building or facility, if applicable (see units of measure set forth in Attachment 1 for each category).

c. Units, if any, set forth under units of measure for category concerned (see Attachment 1):

(1) Number of family units, number of persons, gallons, barrels, space volume (cubic feet), etc., with units of measure.

d. Amount of area or units not being used for military purposes, as indicated hereinafter (stated in units of measure for area, if any, set forth under units of measure for category concerned; otherwise use units, if any).

(1) Vacant space (exclude buildings and facilities that are partially utilized).

(2) Space used by other Government agencies, State or local Governments and private enterprise (out-grants) for non-military use and annual rental received for such use.

e. Year of initial completion, year of major rehabilitation, or year of acquisition (use most recent date). Use year of acquisition for leased buildings and facilities.

f. Cost of construction to the United States Government - total construction cost including the installed personal property, administrative overhead costs and costs of Government-furnished material and labor. If cost was not incurred by reporting service, it will be secured from appropriate department or agency and reported, unless such building or facility was acquired for military use by license, permit, temporary executive order, temporary public land order, or temporary territorial order. Costs will be estimated if actual costs cannot be determined. The cost record should be maintained in a manner that will make it possible to show cost of Government improvements constructed by the military Department on leased land.

g. Condition (use one of the following adjectives: Useable or Unuseable):

(1) U (Useable) - Indicates the condition of a facility which is presently useable and requires maintenance equivalent to 20% or less of the current replacement cost for continued serviceability. It also includes buildings which are temporarily unuseable but which can be economically restored to serviceable condition.

(2) N (Unuseable) - Indicates the condition of a facility which is presently unserviceable and has deteriorated beyond economical restoration or constitutes a danger to the health or safety of personnel, or to equipment housed therein. It also includes facilities which are presently being used but for which the annual maintenance cost is in excess of 20% of the current replacement cost.

5. Location Maps or Plats of a reasonable scale showing location of all structural improvements and pavements readily identifiable from an attached building or facilities list. Existing Master Plan Maps and Building Layout Maps will be used for this purpose. The maps or plats will be of a type and character that will permit reproduction by printing or photographing if such reproductions are requested. Such maps or plats will be revised at least once a year to show any changes that have occurred.

B. The inventory will include the following data for each leased property which is not a part or all of an installation (exclude general purpose space provided by General Services Administration in the 128 metropolitan areas of the United States):

1. Using service

2. Contract or condemnation number

3. Location

4. Type of space

5. Area

6. Annual rental (include any cost to Government in lieu of rental, e.g., charge against reparations, etc.)

IV. Inventory Summary

A. The inventory summary to be submitted will not exceed 10 x 14 inches in size and will conform to format shown as Attachment 2 for Sections II. and III., however, information required by paragraph III. A. 1. will not be shown in format for Section II. The military Department having management responsibility for a joint installation or leased facility will be responsible for submitting the inventory summary of such installation or leased facility. The pages of the inventory summary will be properly numbered, printed on both sides and fastened in an appropriate manner. The inventory summary will consist of four sections: I. Index; II. Consolidated Installations Summary; III. Installation Summary; and IV. Summary of Leases. The inventory summary may be divided into separate volumes of suitable size for ease in handling.

B. Section I., Index, will contain three indexes which will show name of installation, location, and page number:

1. Alphabetical world index of all installations in the United States, its Territories and Possessions, and overseas.

2. Alphabetical geographic index of installations in each state, District of Columbia, country, territory, or possession, arranged as follows: each of the 48 states and District of Columbia in alphabetical order, each territory and possession of the United States in alphabetical order, and each foreign country in alphabetical order.

3. Alphabetical command index of installations in each Army Area, Naval District, Air Force Command, and Overseas Command.

C. Section II., Consolidated Installations Summary, will contain a tabulation by categories (use format listed as Attachment 2) and a tabulation of grand totals for number of installations, number of buildings, cost of Government improvements, cost of Government improvements on leased land, annual rental received, and annual rental paid for each of the following:

1. All installations.

2. All non-industrial installations.

3. All industrial installations.

4. All active non-industrial installations by state, District of Columbia, United States, country, territory, and possession.

5. All inactive non-industrial installations by state, District of Columbia, United States, country, territory, and possession.

6. All active industrial installations, separately, for (a) contractor-operated, and for (b) Government-operated by state, District of Columbia, United States, country, territory, and possession.

7. All standby industrial installations by state, District of Columbia, United States, country, territory, and possession.

8. All active non-industrial installations in the United States. List the following types of installations (principal function), separately, for each of the 48 states, District of Columbia, and the United States:

a. Airfields.

b. Cemeteries.

c. Harbors and ports.

d. Depots.

e. Hospitals.

f. All others.

9. All inactive non-industrial installations in the United States. List the following types of installations (principal function), separately, for each of the 48 states, District of Columbia, and the United States:

a. Airfields.

b. Cemeteries.

c. Harbors and ports.

d. Depots.

e. Hospitals.

f. All others.

D. Section III., Installation Summary, will contain the following data.

1. Such data will be arranged under appropriate headings and subheadings, as follows:

a. Active non-industrial installations by Army Area, Naval District, Air Force Command, and Overseas Command, as applicable. Installations will be arranged alphabetically under each of these.

b. Inactive non-industrial installations by Army Area, Naval District, Air Force Command, and Overseas Command, as applicable. Installations will be arranged alphabetically under each of these.

c. Active industrial installations, Government-operated by Army Area, Naval District, Air Force Command, and Overseas Command, as applicable. Installations will be arranged alphabetically under each of these.

d. Active industrial installations, contractor-operated by Army Area, Naval District, Air Force Command, and Overseas Command, as applicable. Installations will be arranged alphabetically under each of these.

e. Standby industrial installations by Army Area, Naval District, Air Force Command, and Overseas Command, as applicable. Installations will be arranged alphabetically under each of these.

2. The format for Section III. is shown on Attachment 2, together with the electric accounting machine summary card form layout to be used in the event electric accounting machine card files are established in the military Department concerned. The information contained in Section III. for each installation is the same as that required for the inventory by A 1, A 3, A 4 a except identification number, A 4 b, A 4 c, A 4 d, and A 4 f, of paragraph III. except for the following:

a. All Government-owned buildings and facilities (except the buildings and facilities included in sub-paragraphs b. and c. below) included in a category will be listed as a separate line item in the summary for each type of construction, i.e., permanent, semi-permanent, and temporary.

b. All buildings and facilities of a category which are leased for military use will be listed as a separate line item in the summary for each type of construction, i.e., permanent, semi-permanent, and temporary, and an asterisk will be placed in the annual rental paid column if such rental is included in the line item for leased land category. An asterisk will also be placed in appraised or estimated value column if such appraised or estimated value is included in the line item for leased land category.

c. All buildings and facilities of a category which are acquired for military use by license, permit, temporary public land order, temporary executive order or temporary territorial order will be listed as a separate line item in the summary for each type of construction, i.e., permanent, semi-permanent, and temporary, and two asterisks will be placed in the cost to Government column.

d. Categories inclosed in parenthesis on Attachment 1 will not be listed as line items in the summary. The property in the inventory for such categories will be included in the category that is not inclosed in parenthesis which precedes such categories.

e. Buildings and improvements will not be listed by categories in the summary if the total cost of such buildings and improvements at an installation does not exceed $100,000, original cost. List totals for installation, as appropriate, on the format.

3. Report at end of each installation listing the grand total for the following: number of buildings, cost to Government, cost of Government improvements on leased land, annual rental received, and annual rental paid.

NOTE: A tab will be attached to back cover for each volume of Section III. This tab will list symbols for units of measure and category name (unabbreviated) for each category in the summary. This tab will be attached in a manner that will permit it to be folded down for reference.

E. Section IV. will contain the same information as that required for the inventory by paragraph III. B. Such information, however, will be listed, separately, for each state, District of Columbia, United States, country, territory, and possession. Also list number of leases and cost of annual rental for each of the above.

REFER TO DOD INSTRUCTION 4165.3, "DEPARTMENT OF DEFENSE FACILITY CLASSES AND CONSTRUCTION CATEGORIES" 11 March 1955,

2 February 1954
NUMBER 5025.1

Department of Defense Directive

SUBJECT Department of Defense Directives System

References: (a) Directive 5025.1, Department of Defense Directives System, 15 April 1952

(b) Secretary of Defense memorandum, Preparation and Publication of Department of Defense Directives System Issuances, 15 April 1952

I. POLICY

The Department of Defense Directives System is the medium through which the Secretary of Defense publishes policy guidance, instructions and orders for the direction and control of all Department of Defense activities. Policies, instructions and orders promulgated through the Department of Defense Directives System, as unclassified documents, will be effective on the respective dates therein stated, without alteration, amendment, paraphrase, or change, throughout all component elements of the Department of Defense. Classified issuances shall be similarly effective within the respective spheres of their distribution. The Military Departments, where necessary and appropriate, may issue supplementary instructions for guidance in connection with Department of Defense Directives System issuances within their respective departments but implementation of Department of Defense Directives System issuances by any and all component elements of the Department of Defense will not be delayed pending publication of any such supplementary instructions. All orders, directives or regulations inconsistent with the foregoing are hereby cancelled, annulled and revoked.

5000

II. CANCELLATION

References (a) and (b) are cancelled.

III. SCOPE AND APPLICABILITY

Department of Defense Directives System issuances include (a) Directives, (b) Instructions and (c) Transmittals.

A. Department of Defense Directives

Department of Defense Directives will be used by the Secretary of Defense to promulgate fundamental policies and such orders and instructions deemed by him sufficiently important to justify the use of a Directive. In explanation but not in limitation of the foregoing, examples of actions to be promulgated by Directives are:

1. Establishment of basic policies, plans or programs of a continuing nature.

2. Establishment of major organizations or assignment of major functions and responsibilities within the Department of Defense.

3. Delegations of authority to officials and organizations within the Department of Defense.

Department of Defense Directives will be signed only by the Secretary of Defense, the Deputy Secretary of Defense, or in their absence by the officer authorized to act as Secretary of Defense.

B. Department of Defense Instructions

Department of Defense Instructions will be used primarily to implement or supplement policies, plans or programs established in Directives or to establish procedures relative thereto. In explanation but not in limitation of the foregoing, examples of actions to be promulgated by Instructions are:

1. Direction or guidance in the application, implementation or execution of Directives.

2. Establishment of programs for periods of brief duration, of limited applicability, or of such procedural nature as to exclude issuance as Directives.

3. Requests for information and reports of a continuing or general nature.

Instructions may be signed by the Assistant Secretary of Defense having cognizance over the particular functional area involved, by the General Counsel in his functional area, or by the respective officials designated to act as Assistant Secretary or General Counsel in the absence of their principals.

C. Department of Defense Transmittals

Department of Defense Transmittals will be used to inform the recipients of minor changes in Directives and Instructions. Transmittals will be used to keep current the documents issued

in the Directives System, and will be prepared and issued by the Office of the Administrative Secretary, Office of the Secretary of Defense. Requests for changes to Directives and Instructions may be signed by the appropriate Assistant Secretary of Defense or the General Counsel and sent to the Administrative Secretary for issuance as Transmittals. Transmittals will be signed by the Administrative Secretary and will be used for:

1. Authorized minor changes to existing Directives and Instructions.

2. Issuance of quarterly check lists of Directives and Instructions.

3. Information on cancelled Directives and Instructions.

4. Other information on the Directives System.

IV. DOCUMENTS EXCLUDED FROM THE SYSTEM

The Department of Defense Directives System shall not be used for:

1. Documents applicable only to or issued for use exclusively within the Office of the Secretary of Defense.

2. One-time requests for information or instructions on a particular or individual matter.

3. Manuals and handbooks.

V. PREPARATION AND PUBLICATION

Information on the preparation and publication of Department of Defense Directives System issuances and maintenance of the System is set forth in Exhibit "A".

VI. DOCUMENTS NOT IN DIRECTIVES SYSTEM

Much material which properly should be included in the Department of Defense Directives System has been omitted therefrom either because the documents were issued prior to the establishment of the System or because of inadvertence. The Assistant Secretaries of Defense, the General Counsel, and other responsible officers of the Office of the Secretary of Defense are requested to review their files and see to it that all pertinent Directives, Instructions and Transmittals are incorporated within the Directives System as soon as possible or are cancelled.

VII. RESPONSIBILITIES OF AND PROCEDURES FOR THE OFFICE OF THE ADMINISTRATIVE SECRETARY

The Office of the Administrative Secretary is the office of record for all Department of Defense Directives System issuances. It will review these issuances only for administrative correctness. Administrative correctness encompasses (1) avoidance of duplicating or conflicting policy, (2) correct references and enclosures, (3) authorized signature, (4) proper identification and distribution, (5) spelling, punctuation, appearance, margins and other format details, and (6) appropriate form for Federal Register publication. The Office of the Administrative Secretary will:

1. Assign appropriate identification to all issuances.

2. Provide reference service on all Department of Defense Directives System issuances.

3. Issue quarterly check lists of all Directives and Instructions currently in force.

4. Assist the Assistant Secretaries of Defense, the General Counsel, and other responsible officers of the Office of the Secretary of Defense in reviewing all outstanding policy memoranda not now in the Department of Defense Directives System with a view to reissue of same within the System or cancellation thereof.

VIII. EFFECTIVE DATE

This Directive is effective 3 February 1954.

EXHIBIT "A"

PREPARATION AND PUBLICATION OF DEPARTMENT OF DEFENSE DIRECTIVES SYSTEM ISSUANCES

I. DEPARTMENT OF DEFENSE DIRECTIVES AND INSTRUCTIONS

A. Preparation

1. The first or title page of each Directive should be prepared in black type on the form illustrated by Enclosure (1). Instructions should be prepared similarly on the form illustrated by Enclosure (2). Spaces for identification number and date on the title page of Directives and Instructions should be left vacant to be filled in by the Office of the Administrative Secretary, OSD, prior to reproduction and distribution.

2. Whenever practicable and appropriate, the first section of Directives or Instructions should state the purpose thereof. Succeeding sections should, to the extent appropriate, identify and cancel related documents, and indicate the applicability, required action and effective date. References and enclosures should be designated by a letter or number.

3. When Directives are sent to the Secretary of Defense for signature, they should normally be accompanied by a brief explanatory memorandum which:

   (a) Sets forth the necessary background information;

   (b) Summarizes the main factors or issues;

   (c) Justifies the course of action recommended;

   (d) Indicates which offices have concurred in or disagreed with the action recommended, and supports the over-riding of any disagreements.

4. Appropriate security classification should be assigned by originators.

B. Coordination

It will be the responsibility of the initiating office to indicate what coordination will be required and to obtain such coordination. Normally SD Form 106 will be used for this purpose.

C. Publication

1. The original and one copy of all Department of Defense Directives or Instructions will be forwarded to the Office of the Administrative Secretary for publication.

2. In those instances where Department of Defense policy statements are approved by the Secretary or Deputy Secretary of Defense in other than the Directive form (Enclosure (1)), the Office of the Administrative Secretary will be responsible for assigning appropriate identification thereto, signing the Directive cover sheet, and publication thereof in the Directives System.

II. DEPARTMENT OF DEFENSE TRANSMITTALS

1. Pen and Ink Changes will be specified for general use in cases where only several words are to be changed.

2. Page Changes will be used where pen and ink changes cannot be conveniently interlineated or where substantial line changes are required.

III. DOCUMENTS FOR PUBLICATION IN THE FEDERAL REGISTER

The Office of the Administrative Secretary (Directives Section) is designated as the central liaison point between the Division of the Federal Register and the Office of the Secretary of Defense. Directives, Instructions and Transmittals containing information required by law to be published in the Federal Register shall be sent to the Division of the Federal Register by the Office of the Administrative Secretary (Directives Section) as prescribed by 1 CFR 1 (Enclosure (6)) and such Directives Section shall be furnished all information and documents necessary for such action. The Office of the Administrative Secretary (Directives Section) will render any assistance needed in the preparation or codification of documents requiring publication.

IV. DISTRIBUTION

Directives System issuances will be distributed by the Director of the Office of Administrative Services (Service and Supply Branch). Unclassified issuances will be distributed in accordance with standard distribution lists based on the major subject groups in Enclosure (5). Classified issuances will receive limited distribution determined by their security classification and subject matter.

NUMBER 7200.2
DATE 28 April 1954

Department of Defense Instruction

SUBJECT Accounting, Control and Reporting on Department of Defense Appropriation Limitations

I. PURPOSE

The purpose of this instruction is to set forth the policies with respect to the accounting for, control and reporting of Department of Defense funds under appropriation and special limitations and any other Congressional limitations on appropriations which are included in the "General Provisions" section of Appropriation Acts.

In those instances where interpretive or policy guidance are required for a specific limitation, it will be covered as a separate instruction.

II. AUTHORITY

Section 401 of the Act of 10 August 1949 (Public Law 216, 81st Congress) places responsibility with the Comptroller of the Department of Defense for establishing and supervising the execution of principles, policies and procedures relating to fiscal and operating accounting.

General Regulations No. 84 - Second Revision dated November 20, 1950, and Supplement No. 3 thereto, make it the responsibility of agencies having funds at their disposal which are subject to limitations to establish and maintain administratively such accounts (including limitation symbols where deemed advisable) as may be necessary to control such limitations.

7200

General Accounting Office Accounting Systems Memorandum No. 11 dated November 24, 1950, sets forth the policies with respect to the accounting and control of funds under limitations.

III. SCOPE

The provisions of this instruction are applicable to all Department of Defense components to which appropriations or funds are made available. When used in this instruction, the term "Department of Defense components" means the military departments and the Office of the Secretary of Defense (including agencies attached thereto for administrative support).

IV. DEFINITIONS

For the purposes of this instruction, the following definitions will apply:

A. Appropriation. Includes appropriations, funds and authorizations to create obligations by contract in advance of appropriations or any other authority making funds available for obligation or expenditure.

B. Appropriation Limitation. An amount fixed by the Congress within an appropriation which cannot be exceeded for obligation or expenditure for certain objects or purposes. This does not mean that such amounts may not be obligated and expended for other objects or purposes except where the amount is specified by law for a specific object or purpose only.

C. Special Limitation. The maximum amount of two or more appropriations or appropriation limitations that may be obligated or expended during a fiscal year for certain objects or purposes. The distinguishing feature of this type of limitation is that it prescribes a maximum amount that may be obligated and expended for the specified objects or purposes under several appropriations but does not necessarily represent a limitation as to the amount under any particular appropriation.

D. Other terminology and concepts used in this instruction may be found in Budget-Treasury Regulations No. 1, June 1952, Revised September 1953; General Regulations No. 84 - Second Revision, and supplements thereto; General Accounting Office Accounting Systems Memorandum No. 11, November 24, 1950; Department of Defense Directive No. 7200.1, 20 March 1952; and Department of Defense Directive No. 7030.1, 25 January 1952.

V. CONTROL

It will be the responsibility of the head of each Department of Defense component to control and administer all limitations (both appropriation and special) which have been established on appropriations or funds of the Department of Defense component. Such controls shall be in accordance with the principles as stated in Department of Defense Directive No. 7200.1, "Administrative Control of Appropriations Within the Department of Defense," 20 March 1952; General Regulations No. 84 - Second Revision, and supplements thereto; and Accounting Systems Memorandum No. 11, November 24, 1950.

In those instances where limitations are established for the Department of Defense, the Assistant Secretary of Defense (Comptroller) will advise the head of each Department of Defense component of the amount allowed the respective component.

VI. ACCOUNTING

The method of accounting for limitations (both appropriation and special) may be accomplished either by memorandum accounts or by appropriation limitation suffixes as stated in General Accounting Office Accounting Systems Memorandum No. 11, dated November 24, 1950, paragraphs 2 and 3 of which are as follows:

"2. Accounting for Appropriation Limitations. Agencies or bureaus administering appropriated funds will be responsible for seeing that the amount obligated under any particular limitation does not exceed the amount to which restricted in the Appropriation Act for the objects or purposes involved. The procedures for the control of obligations under appropriation limitations should be geared into the allotment and fund control procedures established for the agency. Accounts or records should be kept and reports prepared for internal use which will reflect the status of the limitations; that is, the total amount available, the amount obligated and expended, and the remaining balance. The accounts or records established for this purpose will be retained by the office or offices keeping the official documents and accounts. These records and reports will be used for subsequent review and audit of the limitations by the General Accounting Office.

"3. Accounting for Special Limitations. Special limitations are contained in appropriation accounts which involve two or more appropriations or limitations, and in certain cases, all the appropriations of a department or agency. The agency will be responsible for seeing that the total amount obligated does not exceed the amount specified in the Act. The head of the agency should inform each of the bureaus or subdivisions which administer appropriated funds of the amount of any special limitation allowed for each bureau or subdivision. Bureaus or offices, when allotting funds, shall inform the offices responsible for incurring obligations for these specified objects or purposes of the amount of any special limitations allowed. Accounts or records should be kept, either as an integral part of the accounting system or as memorandum records which will reflect the status of limitations allowed for any particular office. The head of the agency should require reports throughout the fiscal year and at least at the end of the fiscal year from each bureau or office, which will show the status of the amounts allowed under each special limitation. These reports should furnish the basis for preparing a consolidated report of the transactions relating to the special limitations. The accounts and reports relating to special limitations will be retained in the departments or bureaus for subsequent review and audit by the General Accounting Office."

Requirements for symbolization of documents are stated in, and will be accomplished in accordance with provisions of General Regulations No. 84 - Second Revision, Supplement No. 3, December 3, 1951.

VII. REPORTING

(1) The head of each Department of Defense component is responsible for seeing that internal reports will be prepared which will reflect the status of the limitations; that is, the total amount available, the amount obligated and expended, and the remaining balance.

(2) Each Department of Defense component will prepare a separate consolidated report as of the end of the fiscal year on the status of each special limitation to show the total amount of the limitation, the amount obligated and expended, and the remaining balance. This consolidated report will be required except in those instances where specific instructions, DOD directives, etc., vary the requirement with respect to any such special limitation.

(3) Such consolidated reports are to be submitted, in duplicate, to the Office, Assistant Secretary of Defense (Comptroller) not later than 60 days after the end of the fiscal year. No report forms are prescribed. Report Control Symbol No. DD-Comp(A)149 has been assigned to this report.

VIII. ADVICE OF ESTABLISHMENT OF ACCOUNTS

Paragraph 6 of Supplement No. 3 to General Regulations No. 84 - Second Revision, states as follows:

> "6. Advice of Assignment of Accounts.— When controls are established for limitations (both appropriation and special) and subsidiary accounts are assigned under working fund and receipt accounts, advices thereof in duplicate should be furnished the General Accounting Office by the administrative agencies for determination that controls for all limitations and proper subsidiary accounts have been provided. Such advices, in the case of limitation controls, should cite pertinent legislative restrictions, amounts, account numbers and description of the method employed in controlling each limitation, and, in the case of working fund subsidiary accounts, should identify the advancing appropriation and describe the general purpose to be accomplished. Notices of the assignment of subsidiary receipt accounts should describe the receipts to be accounted for thereunder and should cite the statutory or other requirements for their segregation from other funds in the basic receipt accounts."

Department of Defense components shall submit three copies of such "Advice of Assignment of Accounts" to the Office of the Assistant Secretary of Defense (Comptroller) for review, approval and transmittal to the General Accounting Office within thirty (30) days after the passage of an appropriation act.

IX. AUDIT

Appropriation limitation and special limitation accounts will be subject to the same internal departmental administrative examination and audit as applied to all other accounts.

X. EFFECTIVE DATE

This instruction is effective immediately.

E58784

NUMBER 7210.1
DATE December 22, 1954

Department of Defense Instruction

SUBJECT Accounting, Control and Reporting on Special Limitation, "Expenses for Public Information and Public Relations Activities", (DD-Comp(Q)188)

References: (a) Department of Defense Directive 7210.1, dated 26 October 1953
(b) Department of Defense Instruction 7200.2, dated 28 April 1954

Enclosures: (1) Memorandum, dated 2 February 1951, for Secretaries of the Army, Navy and Air Force, from Assistant Secretary of Defense (Comptroller), Subject: Regulations for Statistical Costing of Military Personnel Services
(2) Department of Defense Instructions for Statistical Costing of Military Services in Industrial- and Commercial-Type Establishments

I. SUPERSESSION

This instruction supersedes reference (a).

II. PURPOSE

The purpose of this instruction is to implement reference (b) by providing additional interpretations and definitions, specifically with respect to the special limitation expenses for public information and public relations activities in the Department of Defense.

III. STATUTORY REQUIREMENT

Section 725 of Public Law 458, 83d Congress, 2d Session, Department of Defense Appropriation Act, 1955, states as follows: "Funds provided in this Act for public information and public relations shall not exceed $3,500,000." This includes pay and allowance of military personnel assigned to such activities.

IV. ACTIVITIES TO BE INCLUDED

A. Pay and allowances of all personnel, including secretarial and clerical, both military and civilian, engaged in the activities indicated below will be included. The applicable share of pay and allowances of personnel engaged in this work on a part-time basis will also be included. In determining the cost of military pay and allowances for services performed by military personnel, the principles and procedures for computing standard

military compensation rates as outlined in the "Department of Defense Instructions for Statistical Costing of Military Services in Industrial and Commercial Type Establishments", dated 2 February 1951, may be used.

B. For the purpose of costing and except as excluded in Paragraph C, below, public information and public relations activities include:

(1) Preparation of material (whether voluntary or upon specific request) for distribution to, and official contacts with representatives of, non-governmental publications.

(2) Preparation of material (whether voluntary or upon specific request) for radio and television broadcasting purposes, and official contacts with broadcasting representatives.

(3) Preparation and publication of advertisements in any form whether paid or free.

(4) Preparation, installation, presentation and circulation (including packing, crating, and transporting) of exhibits, except those for internal use, procurement purposes, or civilian contractor plant morale and incentive purposes.

(5) Production and presentation of motion pictures and film strips, except those for internal use within the Government.

(6) Preparation and printing of publications other than those required by law or those issued primarily for internal use in the Government.

C. The following activities are excluded:

(1) Time of civilian and military officials (other than those having public information or public relations as a specific responsibility) who, by virtue of their offices, are called upon to participate in such activities.

(2) Time of personnel devoted to such matters as accounting, personnel records or supply for public information or public relations activities.

(3) Time of personnel whose work is devoted to publications required by law, or those primarily for use within the Government.

(4) Answering of correspondence and inquiries from the public, or participating in meetings intended to answer questions from the public.

(5) Issuance of interpretations of regulations, orders issued under the Administrative Procedures Act, etc.

(6) Time of personnel at "open-house" presentations at military installations, participating in parades, musical concerts and demonstrations.

(7) Advertisements, exhibits, films, film strips or publications relating to acquisition of government property, or recruitment or employment of government personnel.

D. Direct expenditures for travel, materials and supplies, and other purposes applicable to the activities indicated in Paragraph B, above, will be included. Incidental expenses, such as use of equipment, transportation of things (other than as specifically provided for in Section IV.B(4)), postage (other than penalty mail which is charged centrally), telephone charges (other than long distance calls), stationery and office supplies, or allocations of indirect expenses for the occupancy of space in military installations are excluded.

E. The activities excluded under Section IV.C and D, above, do not apply to the appropriation "Salaries and Expenses, Office of Public Information, Department of Defense". In the case of the Office of Public Information, OSD, all expenses incurred in the operations of that office are subject to the limitation stated in Section 725 of Public Law 458, 83d Congress.

V. ACCOUNTING, CONTROL AND REPORTING PROCEDURES

A. The policies stated in reference (b) will apply for purposes of accounting and control of public information and public relations activities.

B. Each department or office of the Department of Defense authorized to expend funds for public information and public relations activities will submit quarterly reports of obligations in duplicate to the Office of the Assistant Secretary of Defense (Comptroller). The first report to be submitted under this Instruction will cover the quarter ending 31 March 1955. These reports are to be submitted not later than the first day of the second succeeding month following the end of the period reported and will show the total amounts available to the respective department or office and the cumulative total obligations for the current fiscal year to date. Obligations should be classified and reported by object of expenditure. It will not be necessary to so classify the amount available. The reporting requirements of this Instruction are in addition to the reporting requirements of reference (b).

VI. REPORT CONTROL SYMBOL

Report Control Symbol DD-Comp(Q)188 has been assigned to the reporting requirement of this Instruction; Report Control Symbol DD-OC(Q)37 is cancelled.

VII. IMPLEMENTING REGULATIONS AND INSTRUCTIONS

A. In addition to the requirements of Section VIII, reference (b), each military department and the Budget and Finance Division, Office of the Secretary of Defense will be responsible for issuing departmental regulations and/or special instructions to implement the provisions of this Instruction for its department or office.

B. Four copies of such regulations or instructions will be submitted to the Office, Assistant Secretary of Defense (Comptroller) within thirty days from date of this Instruction.

VIII. EFFECTIVE DATE

This Instruction is effective immediately.

NOTE: Enclosures 1 and 2 have been purposely omitted.

W. J. M., Jr.

24 July 1952
NUMBER 7220.1

Department of Defense Directive

SUBJECT Regulations Governing the Use of Project Orders

Reference: Regulations Governing the Use of Project Orders Within the Department of Defense (Project Order Regulations, Issued 8 November 1950).

Enclosures: (1) Project Order, DD Form 411
(2) Status of Project Orders (Consolidated), Report Control Symbol DD-OAP(M)1, DD Form 412.

I. PURPOSE

These regulations prescribe uniform policies and procedures for the intra- and inter-military departmental use of project orders, and for project orders placed with other agencies of the Federal Government.

II. CANCELLATION

Referenced regulations are cancelled and superseded by this directive.

III. AUTHORITY

A. Statutory authority for issuing project orders, and for cross-disbursing in connection therewith, is contained in:

1. The Acts of June 5, 1920; July 1, 1922; June 2, 1937 (41 U.S.C. 23).

2. Sections 405 and 409, National Security Act of 1947, as amended.

B. Departments are authorized to enter into project order transactions with each other and with other agencies of the Federal Government, subject to the provisions contained in these regulations, when it is determined to be in the best interests of the Government.

IV. DEFINITIONS

A. A project order is a specific, definite and certain order placed under authority of the Acts of June 5, 1920 and July 1, 1922 (41 U.S.C. 23) for the manufacture of materials, supplies and equipment, or for other work or services, which, when placed with Government-owned establishments, serves to obligate appropriations in the same manner as orders or contracts placed with commercial enterprises. All future orders within the meaning of this definition and issued pursuant to these regulations shall be termed "project orders."

B. The unqualified term "department" as used in these regulations means one of the three military departments; it also includes any component thereof.

C. The term "intra-departmental project orders" as used in these regulations means those project orders issued and accepted by components of the same military department.

D. The term "inter-departmental project orders" as used in these regulations means those project orders issued by a component of one military department and accepted by another military department.

V. APPLICABILITY

A. These regulations apply to all project orders issued to Government-owned establishments within and outside the Department of Defense. They also apply to subsidiary orders and subcontracts placed pursuant to such project orders.

B. Project orders, or equivalent obligations, now in effect are not abrogated by these regulations, but all new project orders, or amendments to current project orders, shall conform to the provisions of these regulations.

VI. BASIC PRINCIPLES GOVERNING THE USE OF PROJECT ORDERS

A. Project orders shall be specific, definite and certain both as to the work encompassed by the order and the terms of the order itself.

B. The work to be performed under project orders shall commence within a reasonable time after issue. As a minimum requirement, evidence must exist at the time of acceptance as to the intention that work will begin without delay.

C. Project orders shall not be used to contravene some other provisions of the law, or to accomplish by means of this device what regulations do not permit under private contract.

D. Government-owned establishments which are recipients of project orders must be substantially in a position to manufacture the materials, supplies and equipment, or equipped to render the work or services ordered.

E. Project orders may not be issued for the sole purpose of continuing the availability of appropriations. Project orders properly issued constitute a valid obligation of appropriations in the same manner as provided for orders or contracts placed with commercial enterprises.

F. Project orders are in the nature of cost-reimbursement type contracts with commercial firms and, like such contracts, must serve a bona fide need existing in the fiscal year in which issued; otherwise, no valid obligation is accomplished. Due consideration shall be given to necessary procurement lead time in establishing such need and to requirements for the replacement of stocks issued during the current fiscal year.

G. Project orders, like commercial contracts, may contain special provisions and may be subsequently modified or amended in conformity with the principles relating to commercial contracts.

H. Recipients of project orders, upon default or failure to perform work or deliver materials specified in the orders, shall be considered as defaulting contractors, with respect to the effect of

such default on the appropriations involved, and the ordered materials or services may be procured otherwise under the appropriations thus obligated. Similarly, project orders may be issued under appropriations obligated by contracts with outside contractors where such contracts are terminated for default or failure on part of the contractors to perform work or deliver materials specified in the contracts. All of these project orders may be issued subsequent to the period of availability of the appropriations for obligation, but they shall be performed within the period of availability for expenditure.

I. Subsidiary ordering (within the Government) and subcontracting (with commercial concerns) under project orders is authorized, provided such subsidiary ordering and subcontracting is incident to and is for use in carrying out the purpose of the project order. In this connection, project orders must contemplate use of personal services and facilities, on the part of the project order recipient, substantially beyond those incident to contract procurement. Expenditures incurred under such subsidiary orders and subcontracts are chargeable to the project order, and to the appropriation obligated thereby.

J. Project orders issued under appropriations are subject to all limitations applicable to the appropriations from which they are derived.

K. Project orders shall not be issued which cannot be fully financed from current obligational authority, or which have the effect of overobligating the obligational authority to which they are chargeable. Project orders may be issued in part under contract authorization(s), provided the orders are programmed in such a manner that the expenditures to be incurred thereunder shall not exceed the cash appropriation(s) available to liquidate such obligations or, in the case of Department of Defense working-capital funds and project orders placed with Government agencies outside the Department of Defense, shall not preclude the ability to reimburse the fund or agency when billed.

L. Each military department is responsible for controlling the project order workload of field establishments under its management control.

VII. PURPOSES FOR WHICH PROJECT ORDERS MAY BE ISSUED

A. Project orders may be issued for the following purposes:

1. Manufacture, building, construction, fabrication, or assembly of structures, equipment or other property.

2. Research and development projects.

3. Improvements to structures, equipment or other property by modification, alteration, renovation, conversion, overhaul or restoration.

4. Major repairs to and replacements of structures, equipment or other property.

VIII. PURPOSES FOR WHICH PROJECT ORDERS MAY NOT BE ISSUED

A. Project orders may not be issued for the following purposes:

1. Routine, recurring, day-to-day maintenance and operation of activities, installations, plants, equipment or grounds.

2. Education, training, subsistence, storage, welfare, transportation, travel or communications where any of these purposes are the primary object of the project order.

3. Any purpose which violates any of the basic principles established in these regulations.

IX. ORDERING PROCEDURES

A. Subject to other provisions of these regulations, project orders may be placed with any Government-owned establishment within or outside the Department of Defense. In order to enable compliance with Section VI L, project orders placed with Department of Defense establishments shall be routed through whatever channels each department may prescribe. DD Form 411 (Enclosure 1) shall be used to issue project orders. The issuance of a properly executed project order constitutes authorization for the recipient to proceed with the performance of the work ordered and to charge or bill the appropriation or other accounts cited thereon. As a minimum requirement, each project order must contain the following:

1. The names and addresses of issuing department and performing establishment.

2. The signature of the officer, or other authorized representative, controlling or having responsibility for the administration of the appropriation to be charged or billed certifying that funds in the amount specified in the project order have been obligated and are available to cover costs chargeable to the project order. If the authorizing officer is other than one having fiscal responsibility, the ordering department must have on file, as support to the certificate, a written statement by such an officer substantiating the fiscal portion of the certificate.

3. The work to be performed specified in detail on the order or incorporated by reference in sufficient detail to enable the performing installation to proceed without delay in carrying out the work ordered.

4. A paragraph reciting the authority of the project order acts; viz., "Acts of June 5, 1920 and July 1, 1922 (41 U.S.C. 23)."

5. An assigned individual identifying number (project order number) in conformity with the administrative practices of the issuing department or component; a firm estimate of the cost of the work to be performed; expiration date of project order; delivery instructions; appropriation title and symbol and all subsidiary accounting classifications chargeable for the work ordered, including the object classification representative of the end product ordered. Limitations, if any, applicable to the appropriation or other accounts relevant to the order shall be cited.

B. The commander of the performing establishment, or his authorized representative, receiving the project order shall indicate his acceptance thereof on one copy, which shall be returned promptly to the issuing department. If the performing establishment is unable to accept the project order, it shall return promptly the original project order form to the ordering department with appropriate explanation.

C. Sufficient copies of each project order shall be furnished to the performing department in accordance with the requirements of that department.

D. Subject to other provisions of these regulations, military departments may also issue project orders pursuant to Military Inter-Departmental Purchase Requests received from other military departments, or pursuant to similar formal requests received from components of the issuing department. Project orders so issued shall cite the appropriations or other accounts cited on the originating purchase requests and shall be cross-referenced to such requests. Sufficient copies of these project orders and amendments thereto shall be furnished to the ordering department in accordance with the requirements of that department. Upon receipt of these documents, the ordering department shall immediately obligate its appropriations or other accounts cited on the project order or amendment, in the amount indicated in the order unless such appropriations or accounts have already been obligated. (See also Section X E).

X. ADMINISTRATION OF PROJECT ORDERS

A. Amendments which increase the scope or value of a project order may be made at any time during the period for which the appropriation obligated by the project order is available for further obligation.

B. After the appropriation expires, an increase in the value of a project order may be made, chargeable to the appropriation of the fiscal year obligated by the project order, provided there is no increase in the scope of the work encompassed by the order. Subsequent to the expiration of the appropriation obligated by the order, amendments which serve to extend the scope of project order work must be financed from appropriations then current.

C. DD Form 411 (Enclosure 1) shall be used to accomplish all basic or formal project order amendments and this form shall be prominently marked "AMENDMENT." Each amendment shall be numbered consecutively and contain reference to the project order being amended. Where the amendment is not basic and involves only a relatively minor change, such as changes in delivery, shipping, packaging, or marking instructions, a formal amendment is not required.

D. Whenever the performing department determines it to be necessary, a project order may be transferred from the establishment which received the order to another establishment within that department,

provided such establishment is in a position to manufacture the materials, supplies and equipment, or is equipped to render the work or services required by the order. All project order transfers shall be coordinated with the ordering department.

E. Where necessary, the performing department may amend those project orders issued pursuant to Section IX D, without prior approval of the ordering department, provided they do not increase the quantity of the items originally ordered or exceed the total dollar amount of funds made available for such items by the ordering department.

XI. FINANCING PROCEDURES

A. As a general principle, project orders shall be financed upon the basis of a citation of appropriations or other accounts; however, project orders issued to establishments operating under working-capital funds, or to establishments of Government agencies outside the Department of Defense, shall be financed initially by charges to such funds, or appropriations of the performing agency, with reimbursement thereto from the appropriations or other accounts cited in the orders.

B. Project orders shall be used without requiring working-fund advances in all instances, whether the work or services are ordered from an establishment within the Department of Defense or from another Government agency; however, progress payments may be made as provided herein. (See Comptroller General's letter B-95760, dated 27 June 1950.)

C. The ordering department shall be responsible for reserving and providing sufficient funds to finance the project order.

D. The performing department or agency is authorized to incur obligations and expenditures within the amount cited on the project order and amendments thereto during the life of the project order and is responsible for insuring that such obligations and expenditures do not exceed the authorized amount.

XII. PRINCIPLES FOR DETERMINATION OF CHARGES

A. As a general principle, subject to B, C, and D, below, project orders placed with establishments within the Department of Defense may be charged for direct labor, direct material and overhead costs incurred in performing work or manufacturing materials

specified therein, but may not be charged with the cost of those items for which expenditures are not made by the performing establishment. (The term "performing establishment" as used in the preceding sentence includes those Department of Defense establishments to which a portion of the project order work has been subcontracted.)

B. Charges to project orders made by Department of Defense establishments operating an industrial-type cost accounting system shall be computed in a manner similar to all other charges developed from such cost accounting system; provided, that performing establishments financed by industrial funds shall compute charges to project orders in accordance with regulations issued by the Comptroller of the Department of Defense (see regulations covering the operation of working-capital funds for industrial- and commercial-type establishments (Industrial Funds)); and provided further, that in no case will an establishment of the Department of Defense, operating an industrial-type cost accounting system (whether or not it is financed by an industrial fund), include in charges to project orders any elements of cost not authorized by the above-cited regulations.

C. Where the performing establishment is within the Department of Defense and is not operating under an industrial-type cost accounting system, charges to intra-departmental project orders may be made in accordance with established policy and, in the case of inter-departmental project orders, pursuant to agreements negotiated prior to placement of such orders; provided, such policy and agreements do not permit the inclusion of any elements of cost not authorized by the regulations cited above.

D. Project orders may not be charged for the cost of capital machinery or equipment to be used in the performance of work, except that they may be charged for the cost of special machinery or equipment acquired specifically for use on a single project order; provided, such charges are specifically approved in advance by the ordering department and this approval is incorporated into the terms of the project order agreement or amendments thereto. Where this is the case, the approved charges shall be segregated from other charges and shown as separate items in billing the ordering department.

E. Charges to Department of Defense project orders made by performing establishments of Federal agencies outside the Department of Defense will be made pursuant to agreements negotiated prior to placement of the orders with those agencies. (The term "performing establishments" as used in the preceding sentence includes those Government-owned establishments to which a portion of the project order work has been subcontracted.)

XIII. ACCOUNTING AND REPORTING PROCEDURES

A. Accounting and reporting procedures applicable to project orders, whether issued within or among military departments, or to Government-owned establishments of other Federal agencies, shall provide for the obligation of appropriations or other accounts at the time the project order is issued. Accounting for all charges to project orders shall be a responsibility of the performing department or agency, including periodic reporting to the issuing department of expenditures incurred in connection with work performed.

B. The department having responsibility for the administration of the appropriations or other accounts to be charged shall record project orders and amendments thereto as obligations in the same manner as, and in accordance with the same principles governing, contracts with commercial enterprises; except where project orders are issued against special credits established in a Department of Defense industrial fund for the free withdrawal of goods or services. Project orders issued against special credits shall not be treated as obligations against appropriations for the purpose of determining available balances (see subparagraph 5(1) of regulations, dated 13 July 1950, covering the operation of working-capital funds for industrial- and commercial-type establishments of the Department of Defense (Industrial Funds)).

C. The performing department shall maintain current and complete files of all basic documents supporting charges made to project orders of the issuing department. These documents shall be available for inspection by the issuing department or for audit.

D. Although accounting and reporting procedures applicable to project orders are not uniform in all circumstances, the principles underlying these procedures remain valid. Differences in procedures occur when:

1. intra- and inter-departmental project orders are placed with Department of Defense establishments operating under working-capital funds;

2. intra-departmental project orders are placed with Department of Defense establishments operating under an appropriation accounting system;

3. inter-departmental project orders are placed with Department of Defense establishments operating under an appropriation accounting system;

4. project orders are placed with Government-owned establishments of Federal agencies outside the Department of Defense.

E. Intra- and Inter-departmental Project Orders Placed with Department of Defense Establishments Operating Under Working-Capital Funds.

1. Accounting procedures to be followed by establishments operating under working-capital funds shall be in accordance with regulations established by the Secretary of Defense.

2. The ordering department shall, when billed, reimburse the funds with the use of Standard Form 1080.

3. Periodic reports shall be submitted to the department issuing the project order, if required by that department. These reports shall include, for each project order, estimated costs incurred to date and an indication of the physical progress made on the work ordered.

F. Intra-departmental Project Orders Placed with Department of Defense Establishments Operating Under an Appropriation Accounting System.

Inasmuch as the accounting and reporting procedure of the three military departments are not uniform, these existing procedures may be continued, in the case of intra-departmental project orders, to the extent they are not in conflict with the provisions of Sections XIII A, B, and C, above.

G. Inter-departmental Project Orders Placed with Department of Defense Establishments Operating Under an Appropriation Accounting System.

1. Section 409 of the National Security Act of 1947, as amended, authorizes cross-disbursing between departments of the Department of Defense.

2. Where direct purchases of supplies, equipment or services are required to fill the order, the cost of such items may be charged directly to the appropriation or other accounts cited on the project order, and the disbursing officer of the performing department may make payment for such purchases through utilization of cross-disbursing procedures. For purposes of these regulations, "Direct purchases of supplies" shall be construed to include acquisition of supplies from stock when such stock is the inventory of a revolving fund established pursuant to law. Copies of the paid vouchers shall be forwarded directly to the ordering department.

3. All other expenses chargeable to the project order, such as labor, materials from stock, overhead, etc., which have been paid out of appropriations or accounts of the performing department, shall be reimbursed without transfer of cash by the use of a Standard Form 1080 prepared periodically by the performing department. The latter department is authorized to execute both the "certificate of billing office" and the "certificate of office billed" and the voucher shall bear the notation "NO CHECK TO BE DRAWN." When the Standard Form 1080 represents the final transaction, it shall be designated as "FINAL." This document shall, in all cases, be transmitted with the regular accounts of the disbursing officer for support of adjustments between the applicable account of advances and appropriations. Also, copies of these documents shall be forwarded directly to the ordering department.

4. All vouchers, purchase orders, executed contracts and similar documents involving payments chargeable directly to funds cited on project orders shall reflect the project order number, and the complete accounting classifications cited on the related project order. In addition to copies which accompany the disbursing officer's regular accounts, a copy

of each disbursement, adjustment or collection voucher shall be transmitted by the disbursing officer to the establishment of the performing department designated to maintain the detailed financial records applicable to the project order.

5. All vouchers and similar documents involving cross-payments on project orders shall contain the following marking made by rubber stamp or bold-face type:

"CROSS-DISBURSING FOR *_____"

(* Name of department for which transaction is made.)

Such extra copies of these documents as are needed to meet the accounting requirements of the performing and ordering departments shall be transmitted with the regular accounts of disbursing officers making cross-payments.

6. The performing establishment shall render to the ordering department, if required by that department, a consolidated monthly status report under Report Control Symbol DD-OAP(M)1, on DD Form 412 (Enclosure 2) covering each project order placed with that establishment by the ordering department. This report will show: (a) the project order number, (b) the total authorized amount of the project order, (c) cumulative obligations to date, (d) cumulative disbursements to date and (e) the estimated percentage of physical completion of the project order.

7. When the work under a project order is physically completed and all known financial transactions are recorded, the project order shall be designated as "FINAL" in the consolidated monthly status report, and the ordering department shall adjust its obligation records accordingly without issuing a project order amendment. Any such adjustment will be in amount of the unobligated amount shown in the report.

8. If the ordering department does not require the performing establishment to render a consolidated monthly status report, it shall require the performing establishment to submit,

after the project order work is physically completed and all known financial transactions are recorded, a statement summarizing all charges made to such project orders.

H. Project Orders Placed with Government-owned Establishments of Federal Agencies Outside the Department of Defense.

1. The ordering department shall, when billed, reimburse the agency. Wherever a long period of time is required in the performance of a project order, periodic progress payments, not in excess of the costs incurred, may be made in a manner similar to those made under commercial contracts.

2. Such reports as are required by the ordering department may be obtained from the performing establishment. In the interests of uniformity, it is recommended that DD Form 412 be used for this purpose.

XIV. INTERNAL AUDITING

Military departments shall extend the scope of their internal audit to include project order systems and shall periodically make test checks of project order transactions to assure compliance with the provisions of these regulations, and also to assure that the safeguards provided in the system are actually in operation and are adequate.

XV. EFFECTIVE DATE

This directive is effective immediately.

XVI. IMPLEMENTATION

These regulations shall be implemented in each military department prior to 30 August 1952 to become effective no later than 30 September 1952. Copies of implementing instructions shall be furnished to the Office of the Assistant Secretary of Defense (Comptroller).

W. J. McNeil
Assistant Secretary of Defense (Comptroller)

INSTRUCTIONS

This form is intended for use by military departments in placing project orders with Government-owned establishments within and outside the Department of Defense.

ITEM 1 - Date of project order or amendment.

ITEM 2 - Name and address of ordering department or component.

ITEM 3 - Number assigned to project order by issuing department or component for control purposes.

ITEM 4 - Number assigned to project order amendment by issuing department or component for control purposes. Formal amendments shall be numbered consecutively.

ITEM 5 - Name, address, and station number of performing establishment.

ITEM 6 - Instructions for place, date and method of delivery, if applicable. Where additional space is required for these instructions, use Supplemental Data Section.

ITEM 7 - Full description of the work ordered *(this may be incorporated by reference)* and such other instructions as conditions of inspections; shipping, packing and marking instructions; etc. Use Supplemental Data Section or attach additional sheets, if necessary. Limitations, if any, applicable to the appropriation or other accounts relevant to this order are shown in the Supplement Data Section below.

ITEM 8 - Insert in these spaces the complete a counting classifications chargeable and the amou obligated by the ordering department or compone for the work ordered *(the block entitled "Allo ment" is to be used only when the ordering depar ment is actually citing an allotment account).*

ITEM 9 - Insert in the spaces provided, the expir tion date of the project order; the name, tit and signature of officer, or his authorized repr sentative, controlling or having responsibili for the administration of the funds cited on t project order or amendment. If authorizing offic is other than one having fiscal responsibilit the ordering department must have on file, as su port to the certificate, a written statement such an officer substantiating the fiscal porti of the certificate.

ITEM 10 - The performing establishment shall ind cate acceptance in this space. Duplicate, beari acceptance date, name, title and signature of a cepting officer shall be returned to the issui department or component. If the performing esta lishment is unable to accept the project order, shall return promptly the original project ord form to the ordering office with appropriate expl nation.

DD FORM 1 JUL 52 412

EDITION OF 1 NOV 50 MAY BE USED.

6 August 1953
NUMBER 7230.2

Department of Defense Directive

SUBJECT Report, "Summary Analysis of Reimbursement Collections by Activity and/or Project" (DD-OC(M)89)

Reference: Assistant Secretary of Defense (Comptroller) Memorandum to Budget Officers of Military Departments, 9 November 1950.

I. AUTHORITY

Pursuant to the provisions of Section 42 of Budget-Treasury Regulation No. 1, Revised, the Bureau of the Budget has requested that the Department of Defense adopt a uniform report on reimbursements collected as a recurring subsidiary report below the appropriation level to support the monthly "Report on Status of Appropriation Accounts," Standard Form 133.

II. PURPOSE

The purpose of this directive is to establish a standard recurring report on reimbursements collected in a manner consistent with the provisions of Department of Defense Directive 7250.3 of 3 February 1953, "Analysis of Appropriation Status by Activity and/or Project" (DD-OC(M)79, DD Form 690).

III. CANCELLATION

Above referenced memorandum is cancelled by this directive.

IV. APPLICABILITY

The provisions of this directive shall apply to all appropriations for military and civil functions of the military departments and the offices of the Department of Defense which are reported on Standard Form 133 except trust funds, Economy Act working funds, management funds, deposit funds, and allocated funds. The foregoing excepted accounts will not be reported unless specifically requested by the Assistant Secretary of Defense (Comptroller). Most of these excepted accounts have been made the subject of separate reporting requirements and directives.

V. REPORTS ON "ANALYSIS OF REIMBURSEMENTS COLLECTED BY ACTIVITY AND/OR PROJECT"

A. A report shall be prepared monthly in accordance with the attached format and instructions, by military departments and offices of the Department of Defense on each account (except those specifically exempted in Section IV above and those accounts having no subdivisions). The report should be arranged in the same page order as the Standard Form 133 which it supports.

B. The report is to be compiled on the basis of the accounting records of the agencies, or be susceptible of ready reconciliation therewith.

C. Reporting on reimbursements collected in the various accounts shall be restricted to current fiscal year activity.

D. For those accounts not required to be reported under Department of Defense Directive 7250.3, classifications below the appropriation level shall be in accordance with the applicable fiscal codes as published by the military departments.

E. Since this is only a summary of detailed records maintained in each of the departments, there is no intent to limit or change the use of other codes to identify reimbursements.

F. Number of Copies

One copy of the report shall be submitted directly to the Bureau of the Budget, and one copy shall be submitted directly to the Office of the Assistant Secretary of Defense (Comptroller)--(Attention, Fiscal Analysis Branch).

G. When to be Submitted

The report shall be submitted not later than thirty-five calendar days following the close of the period covered by the report. The initial report will be for the month ending 31 July 1953.

H. Report Control Symbol DD-OC(M)89 has been assigned to this reporting requirement.

Attachment

INSTRUCTIONS FOR PREPARATION OF SUMMARY ANALYSIS OF REIMBURSEMENTS COLLECTED BY ACTIVITY AND/OR PROJECT

The following instructions are applicable to the format on the reverse side:

COLUMN 1 - ACTIVITY AND/OR PROJECT

Classification by budget activity, program, project or other subdivision shall be the same as that required for DD Form 690 (DoD Directive 7250.3 of 3 Feb 1953) for unexpired and expired general (direct) appropriations. For special, working capital (revolving) and replacing accounts, the classification shall be in accordance with applicable fiscal codes of the military departments.

COLUMN 2 - COLLECTIONS IN CURRENT FISCAL YEAR

Enter in this column the amount of reimbursements collected, by appropriate classifications, from the beginning of the current fiscal year to the end of the reporting period. The total of Column 2 will be the same as reported on line 4A of Standard Form 133.

COLUMN 3-8 - SOURCE OF COLLECTIONS

Enter in each of these columns, by appropriate classifications, that portion of the total reimbursements collected in the current fiscal year as reported in Column 2 which were received from funds of the agencies listed: Columns (3) Army, (4) Navy, (5) Air Force, (6) Mutual Defense Assistance Program, (7) Non-Federal sources, such as collections for sales of meals and commissary items to civilians, military personnel, etc., and (8) all other Government agencies. The code numbers listed under each of the agency columns refer to those codes employed by the Treasury Department in its assignment of appropriation symbols.

3 February 1953
NUMBER 7250.3

Department of Defense Directive

SUBJECT Report, "Analysis of Appropriation Status by Activity and/or Project" (DD-OC(M)79, DD Form 690)

Reference: Memorandum dated 18 July 1952 from Assistant Secretary of Defense W. J. McNeil to Secretaries of the Military Departments

I. AUTHORITY

Pursuant to the provisions of Section 42 of Budget-Treasury Regulation No. 1, Revised, the Bureau of the Budget has requested that the Department of Defense adopt a uniform report to be used by military departments and offices of the Department of Defense as a recurring subsidiary report of transactions below the appropriation level to support the monthly "Report on Status of Appropriation Accounts," Standard Form 133.

II. PURPOSE

The purpose of this directive is to establish a standard and consistent pattern for subsidiary reports of "Appropriation Status by Activity and/or Project." The trend toward fewer appropriations, greater numbers of activities, projects and sub-projects, and much larger amounts in the individual programs makes it important that subsidiary reporting of Department of Defense appropriation accounts be on a more adequate basis.

III. CANCELLATION

Above referenced memorandum is cancelled by this directive.

IV. APPLICABILITY

The provisions of this directive shall apply to all appropriations for military and civil functions of the military departments and the offices of the Department of Defense which are reported on Standard Form 133 except trust funds, working funds, working capital

funds, management funds, deposit funds and allocated funds (as defined in Budget-Treasury Regulation No. 1). The foregoing excepted accounts will not be reported unless specifically requested by the Assistant Secretary of Defense (Comptroller).

V. REPORT ON "ANALYSIS OF APPROPRIATION STATUS BY ACTIVITY AND/OR PROJECT"

A. A report shall be prepared monthly on DD Form 690 (See Attachment A) by military departments and offices of the Department of Defense on each unexpired and expired account (except those specifically exempted in Section IV above and those accounts having no subdivisions). The reports shall be arranged in the same order as the Standard Form 133 which they support.

B. The reports are to be compiled on the basis of the accounting records of the agencies, or be susceptible of ready reconciliation therewith.

C. In instances where the report is prepared mechanically and DD Form 690 is not adaptable to the particular machine to be used, a substitute form containing the same information may be prepared after approval by the Assistant Secretary of Defense (Comptroller).

D. DD Form 690 has been designed for reporting unexpired and expired appropriation and fund accounts. However, information contained in the reports shall be restricted to current fiscal year activity only. Reports of expired appropriations made on a cumulative basis from the inception of the appropriation are not acceptable under this directive.

E. During fiscal year 1954 and thereafter accounting and reporting for payments and obligation adjustments, under multiple-year and no-year appropriations, are required separately by fiscal year programs unless specifically exempted by the Office of the Assistant Secretary of Defense (Comptroller).

F. Number of Copies

The original and first duplicate of the report (DD Form 690) shall be submitted directly to the Bureau of the Budget. In addition, three copies shall be submitted directly to the Office of the Assistant Secretary of Defense (Comptroller).

G. When to be Submitted

The report shall be submitted monthly unless the Assistant Secretary of Defense (Comptroller) advises the agency concerned that the report for specific accounts may be submitted on a quarterly basis. The report shall be submitted not later than thirty calendar days following the close of the period covered by the report. The initial report will be for the month ending 31 January 1953.

H. The report shall be transmitted by a covering letter which shall be signed by an officer duly authorized by the head of the department or office.

I. Report Control Symbol DD-OC(M)79 has been assigned to this reporting requirement.

DD FORM 1 JAN 53 690

INSTRUCTIONS FOR PREPARATION OF DD FORM 690

(ANALYSIS OF APPROPRIATION STATUS BY ACTIVITY AND/OR PROJECT)

COLUMN 1 - ACTIVITY AND/OR PROJECT

(a) Unexpired accounts - Each account shall be subided by budget activity, program, project or on such er basis as will be determined by the Office of the istant Secretary of Defense *(Comptroller)* and the Bureau the Budget after consultation with the reporting agency. tiple-year and no-year appropriations may be required e reported by program year. Such program years, budget grams, activities, projects, or other subdivisions there- will be listed in Column 1 of DD Form 690. If all funds ilable under the appropriation account are not so disuted, descriptive titles of the balances of funds will be included in this column; they may be described as dget reserves", "administrative reserves", "undistrib- balances", etc.

(b) Expired accounts - The classifications for expired ounts ordinarily will be in accordance with applicable al codes.

COLUMN 2 - ANNUAL PROGRAM AND/OR UNOBLIGATED BALANCES

(a) Unexpired accounts - Enter in Column 2 the distrion of the amount available for obligation. The total he amounts entered in this column shall be the same as wn on lines 6 and 12 of Standard Form 133. The differe between the amounts distributed and the total will be wn as "budget reserves", "administrative reserves", "unributed balances", etc.

(b) Expired accounts - Only the total line will be d for reporting expired accounts unless the detail for cific accounts is requested by the Office of the Assist- Secretary of Defense *(Comptroller)*.

COLUMN 3 - FUNDS APPORTIONED AND AVAILABLE FOR OBLIGATION TO END OF CURRENT QUARTER

(a) Unexpired accounts - Enter the distribution of the al apportionments available to the end of the current rter as reported on lines 9 and 10A of Standard Form 133. ribution of funds apportioned and available for obliga- will be made from the allocation or allotment reports. difference between the amount distributed and the total rtionments to the end of the current quarter will be rted as unallocated or unallotted apportionments, which- the case may be.

(b) Expired accounts - This column will not be used reporting expired accounts.

4. COLUMN 4 - OBLIGATIONS INCURRED IN CURRENT FISCAL

(a) Unexpired accounts - Enter the amount of obtions, by appropriate classifications, incurred fro beginning of the current fiscal year to the end of th porting period. In the case of multiple-year and noappropriations, all adjustments, either increasing o creasing prior year unliquidated obligations will b ported in this column opposite the corresponding amoun ported in Column 5, "Unpaid Obligations as of 1 July". total of Column 4 will be the same as reported on l of Standard Form 133.

(b) Expired accounts - Enter all adjustments made ing the current year which either increases or decr prior year unliquidated obligations. The total of column will be the same as reported on line 9 of Sta Form 133.

5. COLUMN 5 - UNPAID OBLIGATIONS AS OF 1 JULY

(a) Unexpired one-year accounts - This column wil be used in reporting unexpired one-year accounts.

(b) Unexpired multiple-year and no-year accounts, expired one-year and multiple-year accounts - The am reported in this column shall be a distribution, by app classification, of the amount of unpaid obligations br forward from the prior year, as reported on line 1 Standard Form 133, and shall remain the same on all re submitted during the year. All adjustments to prior unpaid obligations will be reported in Column 4.

6. COLUMN 6 - PAYMENTS DURING CURRENT FISCAL YEAR

Enter the amount of payments *(net of refunds o* distributed by appropriate classification, made fro beginning of the current fiscal year to the end of th porting period. The total of this column will be the as reported on line 14 of Standard Form 133.

7. COLUMN 7 - UNPAID OBLIGATIONS END OF PERIOD

Enter in this column the result of Column 4 plus Co 5 minus Column 6. The total of this column will be same as reported on line 13C of Standard Form 133.

8. COLUMN 8 - UNOBLIGATED

Report in this column the difference between the amo shown in Column 3 and Column 4. The total of this co will be the same as reported on line 10A of Standard 133. In the case of expired accounts, this column wil reported in total only and not in detail.

NUMBER 7250.4
DATE 11 August 1954

Department of Defense Instruction

SUBJECT Monthly Report on Status of Funds by Budget Category (DD-Comp(M)171)

Reference: (a) Department of Defense Directive 7250.4, "Monthly Report on Status of Funds by Budget Category," (DD-OC(M)100) Dated 31 August 1953

I. PURPOSE

This instruction revises and continues the monthly report on the status of funds available for obligation and expenditure distributed by budget categories.

II. DEFINITION

A. The term "budget category" as used herein means those categories as given in the Department of Defense Budget Category Definitions, as revised and effective 1 July 1953.

B. The terms "budget activity and/or project" as used herein mean the same as defined and currently in use in the fiscal codes of the military departments, and as referred to in Department of Defense Directive 7250.3, Report, "Analysis of Appropriation Status by Activity and/or Project," (DD-OC(M)79, DD Form 690), 3 February 1953.

III. SUPERSESSION

This instruction supersedes reference (a).

IV. APPLICABILITY

The provisions of this instruction shall apply to all appropriations for military functions and to funds allocated (transferred) for the mutual defense assistance programs, but will exclude trust funds, Economy Act working funds, and deposit funds (as defined in Budget Treasury Regulation No. 1). The foregoing excepted accounts will not be reported unless specifically requested by the Assistant Secretary of Defense (Comptroller).

V. REPORT ON "MONTHLY STATUS OF FUNDS BY BUDGET CATEGORY"

A. A report shall be prepared monthly on DD Form 736 (see attachments) by military departments and Office of the Secretary of Defense of the Department of Defense in accordance with the detailed instructions for its preparation; such monthly report will provide separate sheets for MDAP funds from those for regular military functions.

B. The report is to be compiled on the basis of the accounting records of the agencies, and shall represent the classification of budget activities and/or projects by budget category in accordance with the conversion code contained in the Appendices.

C. The conversion of the fiscal codes of the military departments and offices of the Department of Defense to the budget category definitions, as contained in the Appendices, is based on the fiscal year 1955 fiscal codes (as published in Army SR-35-210-55 and SR-35-213-1, Navy Comptroller Manual, Volume 2, and Air Force Manual 172-1).

D. The conversion tables do not list all of the budget activities and lower sub-divisions of each appropriation given in the fiscal codes, but are restricted to that level of a sub-division which may be classified in its entirety within the first sub-category of a major budget category (i.e., within the sub-category designated by a capital letter, A, B, C, etc.). Where necessary, exceptions to this rule of conversion are indicated. It is recognized that, because of differences in the scope and content of the budget activities and/or projects among the military departments, the conversion tables do not represent an exact classification by budget category, but the tables are intended to effect as nearly as practicable such a classification without imposing onerous clerical burdens in reporting.

E. Any revision to these conversion tables must be approved by the Assistant Secretary of Defense (Comptroller) - attention, Fiscal Analysis Branch.

F. Status of Funds Available for Obligation, Section 1. The section of the report on the funds available for obligation, obligations incurred, and unobligated balances shall be confined to current general (direct) appropriations only, and will not include expired general (direct) appropriations nor special, working capital and working funds, etc.

G. Status of Funds Available for Expenditure, Section 2. The section of the report on funds available for expenditure, expenditures and unexpended balances, as well as unpaid obligations, shall include all accounts as defined in Section IV, which are available for expenditure during a fiscal year.

H. Reimbursements, Treatment of. For Section 1 on the status of funds available for obligation, no adjustment shall be made to exclude reimbursable operations; however, for Section 2 of the report on the status of funds available for expenditure, adjustments are to be made to exclude reimbursable operations, except for unpaid obligations which shall be left gross of reimbursements.

I. Number of Copies. One copy of each monthly report shall be submitted to the Assistant Secretary of Defense (Comptroller) - attention, Fiscal Analysis Branch - who will prepare and publish a summary thereof for the Department of Defense.

J. When to Be Submitted. The report shall be submitted not later than thirty-five calendar days following the close of the month covered by the report, so as to synchronize with the reporting date for the DD Form 690 (DoD Directive 7250.3), or its equivalent for MDAP funds.

K. In instances where the report is prepared mechanically and the DD Form is not adaptable to the particular machine to be used, a substitute form containing the same information may be prepared.

VI. EFFECTIVE DATE

These revised instructions will be applicable to the report for the month ending 31 July 1954.

VII. REPORT CONTROL SYMBOL

Report Control Symbol DD-Comp(M)171 has been assigned to this reporting requirement. Report Control Symbol DD-OC(M)100 is cancelled.

Assistant Secretary of Defense
(Comptroller)

Attachments

INSTRUCTIONS FOR PREPARATION OF DD FORM 736, SECTION 1
(Monthly Report on Status of Funds by Budget Category - Obligations)

COLUMN 1 - BUDGET CATEGORY AND SUB-CATEGORY

(a) As defined in Department of Defense Budget Category Definitions, 1 July 1953.

(b) Since the status of funds available for obligation is restricted to current general (direct) appropriations, budget category VIII, working capital (revolving) funds have been omitted from this form.

(c) "Undistributed" line includes those amounts not distributed by any sub-category because such funds have not yet been programmed (i.e., budgetary reserves (legal and administrative), etc.).

(d) "Memorandum - Operation and Maintenance Procurement" lines refer to those specifically selected types of procurement not included under Major Procurement and Production but ordinarily procured with operation and maintenance funds, and which are included in the amounts reported under applicable sub-categories of II - Operation and Maintenance. By identifying these procurement items, in total, it will render possible the answer to many inquiries received by the Department of Defense for rough measures of total procurement.

COLUMN 2 - ANNUAL PROGRAM AND/OR UNOBLIGATED BALANCES

Enter in this column the distribution of the amount available for obligation as "planned" or "programmed" for the fiscal year. The total of the amounts entered in this column shall be the same as shown on the total line of column 2 of DD Form 690 for unexpired accounts or the amount allocated for MDAP (equivalent to column 2 of DD Form 690), and on lines 6 and 12 of Standard Form 133. The difference between the amounts distributed by budget category and the total will be shown as "undistributed."

COLUMNS 3 AND 4 - OBLIGATIONS INCURRED IN CURRENT FISCAL YEAR

(a) Enter in column 3 the amount of obligations, by appropriate category, incurred during the reported month.

(b) Enter in column 4 the amount of obligations, by appropriate category, incurred from the beginning of the current fiscal year to the end of the reporting period. The total of column 4 will be the same as the total reported in column 4 of DD Form 690 (or equivalent for MDAP) and the same as reported on line 9 of Standard Form 133. Note that the data for MDAP will be confined to the current fiscal year, instead of cumulative since FY 1950.

COLUMN 5 - UNOBLIGATED BALANCE

Report in this column the difference between the amounts shown in column 2 and column 4.

REPLACES DD FORM 440, 1 AUG 52, WHICH IS OBSOLETE.

INSTRUCTIONS FOR PREPARATION OF DD FORM 736-1, SECTION 2
(Monthly Report on Status of Funds by Budget Category - Expenditures)

COLUMN 1 - BUDGET CATEGORY AND SUB-CATEGORY

(a) As defined in Department of Defense Budget Category Definitions, 1 July 1953.

(b) This Section 2, status of funds available for expenditure, covers all funds (unexpired and expired) except trust, Economy Act working, and deposit funds.

(c) "Undistributed" line includes those amounts not distributed by any sub-category because such funds have not yet been programmed (i.e., budgetary reserves (legal and administrative), etc.), and, in addition, unobligated balances of expired accounts.

(d) "Memorandum - Operation and Maintenance Procurement" lines refer to those specifically selected types of procurement not included under Major Procurement and Production but ordinarily procured with operation and maintenance funds, and which are included in the amounts reported under applicable sub-categories of II - Operation and Maintenance. By identifying these procurement items, in total, it will render possible the answer to many inquiries received by the Department of Defense for rough measures of total procurement.

(e) Since the conversion tables contained in the Appendices cover only the accounts as reported in the fiscal year 1955 published fiscal codes, it will be necessary for completion of this expenditure Section 2 to utilize the conversion codes to prior year appropriations, budget activities and/or projects as are applicable and as were developed in connection with reports for fiscal years prior to 1955 (reference (a)). Such conversion codes among the budget activities and/or projects should be applied consistently with the conversion tables in the Appendices.

COLUMN 2 - AVAILABLE FOR EXPENDITURE

Enter in this column the distribution of the amount available for expenditure for the fiscal year. This amount will not be the same as the amount "programmed" or available for obligation in section 1 of DD Form 736, but, in addition to the amounts programmed for obligation in the current general accounts, the amount available for expenditure will include the "unliquidated balances" from prior year funds (unexpired and expired) - i.e., column 2, "annual program and/or unobligated balances," for unexpired accounts, plus column 5, "unpaid obligations as of 1 July," for expired and unexpired accounts, plus or minus obligational adjustments in column 4 for expired accounts, as reported on DD Form 690; the amount available for expenditure under MDAP will be determined on an equivalent basis to that for regular military functions. In addition, the amount available for expenditure should be adjusted to eliminate anticipated transfers and reimbursable operations - i.e., for reimbursable operations, the amount available for expenditure, as determined by the above method, should be

reduced by subtracting the amount of reimbursements collected through the reporting period (as reported by appropriate classification under DoD Directive 7230.2, 6 Aug 53); and by subtracting, by appropriate classification, the amounts of reimbursement receivables and anticipated reimbursements. The total of column 2 will be the same as the amount available for expenditure less collected reimbursements as reported on monthly Summary Report on Status of Appropriations (Summary of S.F. 133).

COLUMNS 3 AND 4 - PAYMENTS MADE DURING CURRENT FISCAL YEAR

(a) Enter in column 3 the amount of payments made, by appropriate category, during the reported month.

(b) Enter in column 4 the amount of payments made, by appropriate category, from the beginning of the current fiscal year to the end of the reporting period. Note that MDAP data will be confined to current fiscal year, instead of cumulative since FY 1950.

(c) Both column 3 and column 4 amounts should be reduced by the amount of reimbursements collected, distributed by appropriate category. The total of column 4 will be the same as the total reported on line 14 less line 4A of the Standard Form 133.

COLUMN 5 - UNEXPENDED BALANCE

Enter in this column the difference between the amounts shown in column 2 and column 4.

COLUMN 6 - UNPAID OBLIGATIONS END OF PERIOD

Enter in this column the amount of the unpaid obligations, by appropriate category, as of the end of the period. The total of this column will be the same as the total reported in column 7 of DD Form 690 or its equivalent for MDAP and line 13C of Standard Form 133.

MONTHLY REPORT ON STATUS OF FUNDS BY BUDGET CATEGORY
SECTION II - STATUS OF FUNDS AVAILABLE FOR EXPENDITURE

Footnotes refer to those budget activities/accounts to which the supplementary classification for the three lines under "Memorandum - Operation and Maintenance Procurement," is applicable:

1/ To be reported under line (1), Petroleum, Oil and Lubricants.
2/ To be reported under line (2), Maintenance Spares and Spare Parts.
3/ To be reported under line (3), Organizational Equipment and Supplies.

*Denotes a modification in the Budget Category Definitions of 1 July 1953, in that accounts no longer included under military personnel appropriations (DoD Directive 7220.3) will, commencing in FY 1955, be excluded from budget category I, Military Personnel Costs and placed under II-Operation and Maintenance, pending revision of published definitions.

7 January 1953
NUMBER 7280.1

Department of Defense Directive

SUBJECT: Establishment and Use of Imprest Funds for Small Purchases (DD-OC(A)75)

I. AUTHORITY

The Joint Regulation for Small Purchases Utilizing Imprest Funds issued by the Administrator of General Services, the Comptroller General of the United States and the Secretary of the Treasury under date of March 10, 1952 establishes the principles, standards and related requirements for the use of Imprest Funds.* A copy of this Joint Regulation is attached hereto.

II. APPLICABILITY

The provisions of this directive and the attachment are applicable to all components of the Department of Defense.

III. UTILIZATION

The authority contained herein for the establishment of imprest funds on a wide basis is for the purpose of aiding in simplifying small purchase procedures. This authority should be used whenever such use will eliminate costly and time-consuming paper processes. It is not, however, the only method of simplification. Full advantage should also be taken of other basic simplified procurement processes such as requisition from agency or other government stocks, use of local term contracts, use of blanket purchase orders, elimination of formal solicitation for bids where authorized, etc.

---

* While this term is borrowed from private industry, it is used in the Joint Regulation to describe a special type of imprest fund generally termed "petty cash funds" in private industry. As a practical matter, the terms, "imprest fund" and "petty cash fund," may be used interchangeably until other types of imprest funds are authorized for use.

To the extent that their use is found to be more economical than other small purchase methods, imprest funds should be used for purchases of supplies and services in all instances where the amount involved is not in excess of the maximum dollar limitations on transactions as provided in paragraph V of this directive.

The use of imprest funds for small purchases results in elimination of some of the controls over procurement transactions which are difficult to justify from a cost viewpoint in transactions of small amounts. Careful use of imprest funds in accordance with appropriate regulations can result in worthwhile savings.

Normal disbursing facilities for the payment of vendors' bills by Government checks should be utilized wherever possible and appropriate.

IV. RESPONSIBILITIES

A. Each military department shall:

(1) Arrange for the establishment and use of imprest funds in areas where their use will facilitate small purchases consistent with the best interests of the United States;

(2) Cause to be issued regulations to implement this directive and to establish appropriate accounting and auditing controls;

(3) Determine what surety bonds are required and the amount of such bonds, within the limitations of the Joint Regulation;

(4) Designate the individuals who will have authority to approve the establishment of imprest funds. Such authority may be delegated by the head of each department, except as otherwise limited in paragraph V hereof.

V. LIMITATIONS

Notwithstanding the provisions of paragraph 8a of the attached Joint Regulation, the maximum amount of any Imprest Fund to be established in the Department of Defense shall be one-third of the estimated maximum monthly disbursements therefrom or $500., whichever is greater, but shall not exceed $5,000. Authority to approve the establishment of imprest funds in excess of $1,000. shall be vested in the head of each department, or if delegated by him, in the heads of bureaus, technical services, command areas, commandants of Naval Districts of River Commands, or the Chief of Naval Air Training, and in each instance shall be justified in writing on the basis of procurement needs and the reimbursement cycle. The

maximum dollar amount of articles or services which may be purchased from one vendor at one time shall be $100. The Treasury Department has stated that it has no objection to the establishment subject to the internal controls outlined in this directive and attachments, of imprest funds with these limitations.

VI. ACCOUNTING PROCEDURE

A. General

The accounting for imprest funds shall be simple but consistent with effective control of cash and shall conform to the requirements of General Regulations 103 of the General Accounting Office as revised March 10, 1952 unless authorization in writing is obtained for deviation therefrom. Any request for authorization of necessary deviations shall be addressed to the Assistant Secretary of Defense (Comptroller).

B. Periodic Count

Unannounced inspections, including cash counts, shall be made of each Imprest Fund at least quarterly by qualified individuals who are under the jurisdiction of the comptroller or chief accounting officer where such positions exist, but, in any case, by individuals who are not subordinate to the Imprest Fund Cashier. Such inspections may be considered to meet all departmental audit requirements under the Joint Regulation.

VII. REGULATIONS

Regulations authorizing the establishment and use of imprest funds, where none exist, shall be issued, or existent regulations shall be revised consistent with this directive within ninety days after date of issue of this directive. Such regulations or revisions of regulations shall before issue be submitted to the Office of the Assistant Secretary of Defense, Comptroller, for concurrence.

VIII. ANNUAL REPORT ON IMPREST FUND SHORTAGES, DD-OC(A)75

At the close of each fiscal year, the Comptroller of each military department shall cause to be prepared and submitted in duplicate on or before 1 September to the Office of the Assistant Secretary of Defense (Comptroller), a report listing the shortages if any, which have been discovered in imprest funds, and recoveries thereof, during the fiscal year and action taken or pending with respect to unrecovered shortages. The report will identify each fund and each cashier involved in any shortage and will state what disciplinary action was taken or is contemplated. A negative report will be submitted if no shortages have been discovered. This report is required for the preparation of a consolidated report to the Secretary of the Treasury. The first shortage report will be prepared for the fiscal year ending 30 June 1953.

IX. SPECIAL REPORT OF 30 JUNE 1953 on IMPREST FUNDS, DD-OC(OT)160

A. A special report shall be made in original only by each military department to the Office of the Assistant Secretary of Defense (Comptroller) as of 30 June 1953, to be received not later than 1 September 1953, which shall contain the following data:

1. Total dollar amount of imprest funds in force on 30 June 1953;

2. Distribution of imprest funds included in item 1, by size;

(a) Number of funds of $500. or less
(b) Number of funds of $501. to $1000.
(c) Number of funds of $1001. to $2000.
(d) Number of funds of $2001. to $3000.
(e) Number of funds of $3001. to $4000.
(f) Number of funds of $4001. to $5000.
(g) Total number of imprest funds in force.

3. For each of the groups listed in paragraph 2 above, the number in which the average replenishment of cycle is weekly, the number in which the average cycle is more frequent than monthly but less frequent than weekly, and the number where the average cycle is monthly;

4. The total dollar volume of transactions paid out of imprest funds between 1 January 1953 and 30 June 1953.

B. Procedures should, therefore, be reviewed and action taken to insure that these data will be readily available for the report of 30 June 1953. Based on the data contained in this report, determination will be made as to the types of recurring reports on imprest fund utilization to be prescribed for future periods.

C. Amounts of imprest funds shall be recorded by disbursing officers on their accounts current as cash held at personal risk, and reports by each military department to the Treasury Department pursuant to Treasury Circular 195 will, therefore, include such imprest funds. However, for purposes of having available on short notice central records in each military department of all such funds established, the accounts current should reflect a breakdown of cash held at personal risk to show each imprest fund separately, as well as other cash held at personal risk.

X. SURETY BONDS

Attention is directed to Departmental Circular No. 900, Treasury Department, dated March 10, 1952 relative to the form of bond to be used by Imprest Fund Cashiers when surety is a corporation.

XI. EFFECTIVE DATE

This directive is effective immediately.

Enclosure (1)

W. J. McNeil
Assistant Secretary of Defense
(Comptroller)

NUMBER 7600.1
DATE 24 June 1954

Department of Defense Instruction

SUBJECT Summary Report of Audit Operations (DD-Comp(A)165)

I. PURPOSE OF REPORT

Statistics in summary form giving basic data on the activities of the departmental audit agencies are necessary at the policy level to aid in planning and coordinating the audit effort in the Department of Defense. Information concerning time expended on the various types of audit activities, work accomplished, workload, and audit results (where measurable) is desired for the following purposes:

a. To determine amount of audit effort being applied to the various audit areas.

b. To compare audit effort with measurable audit results to the extent possible.

c. To compare the audit activities of the departments.

d. To use as background data on which to base policy determinations.

e. To aid in reviewing and evaluating overall operations.

f. To provide a minimum of general information for use in responding to Bureau of the Budget, General Accounting Office, and Congressional inquiries.

7600

II. FORMAT OF REPORT

The report consists of six schedules as follows:

SCHEDULE A Personnel and Operating Expense Summary.
" B Summary of Personnel Time by Type of Audit Activity.
" C Summary of Indirect and Administrative Time.
" D Cost-Type Contract Workload and Costs Audited.
" E Fixed-Price and Special Audit Assignments.
" F Analysis of Audits of Price Redetermination and Incentive Type Contracts.

III. SUBMISSION OF REPORT

The report should be prepared by the central audit organization of each department and submitted in duplicate on or before 1 September, annually, to the Assistant Secretary of Defense (Comptroller), attention:

Audit Branch, Accounting Policy Division. The first report, due 1 September 1954, need only include that information for fiscal year 1954 available at audit headquarters, without requiring special reports from field offices. Subsequent reports will be complete.

Schedules A, B, and C require information pertaining to both contract audit and internal audit operations. For the present the Navy audit organization may prepare each of these schedules separately for its contract audit division and its internal (activity) audit division rather than combining the data for both activities on one schedule. Schedules E and F provide for reporting the direct man-years applicable to completed contract audit assignments. It is understood that the Navy audit organization is unable to include this information because its administrative reporting system for contract audits does not provide for recording time by assignments.

Since there will be necessity for some variation in the content of certain schedules, forms have not been reproduced. However, data should be submitted in substantially the same form as illustrated.

IV. INSTRUCTIONS FOR PREPARATION OF SCHEDULES

a. SCHEDULE A - Personnel and Operating Expense Summary.

In Section I, report the personnel assigned to Headquarters, Regional Offices, and Audit Installations (branch and resident offices) in detail as indicated. Regional Offices are defined as those intermediate headquarters offices designated as Regional Offices, SCI Area Offices, and District Headquarters Offices, in the Army, Navy, and Air Force, respectively. For purposes of this report Navy audit offices (for activity audits) should be identified as branch offices. In Section II, report operating expenses for the period, broken down as indicated. If actual pay and allowance figures for military personnel are not available, weighted statistical average tables prescribed by departmental regulations may be used for computing this item.

b. SCHEDULE B - Summary of Personnel Time by Type of Audit Activity.

(1) Section I is designed to show personnel time available during the period segregated by direct time expended on contract audits, direct time expended on internal audits, and total indirect and administrative time.

(2) Under "Contract Audits" are listed categories of audit work common to all three audit agencies. In addition to those listed, each agency should show separately the other categories used by it in classifying audit work. The "Other" category will cover only minor miscellaneous audit work which is not included elsewhere.

(3) Under "Internal Audits" (classified by Air Force as "Intra-Air Force" and Navy as "Activity" audits) list separately by major categories the types of audit work performed.

(4) In the "Man-Years" column, opposite contract audits and internal audits report the direct time charged to the various types of audits or audit work. For this, and other schedules as required, compute man-years by dividing hours by 2,080 and carry computations to one decimal place. It is believed that the audit agencies' definitions of direct time are fairly uniform, including audit time, report writing and first review time, and report typing time.

(5) In the "Percentage" column show the percentage that the total direct man-years for each type of contract audit activity is to the total man-years expended on contract audits. Show similar computations for internal audits.

(6) Section II summarizes personnel time showing for both contract audits and internal audits the direct man-years, indirect man-years, and total man-years applicable thereto.

c. SCHEDULE C - Summary of Indirect and Administrative Time.

Each audit agency should list categories of work or activity used to classify indirect and administrative time, showing the man-years expended for each category. For example, the Air Force will report the man-years applicable to each of the following categories:

Executive Supervision	Training
Inspection and Field Survey	Processing and Orientation
Office Administration	Procurement Liaison
Travel	Coordinating Activities
Annual Leave	Other
Sick Leave	

In addition, a category for lost or idle time is recommended.

Where separate classifications are maintained for the Industrial and Internal Divisions, this schedule should show the breakdown of indirect time applicable to each division appropriately identified.

The time of headquarters personnel will be reported as indicated. Time not included elsewhere on Schedules B and C will be entered in the "Man-Years" column. Time of headquarters personnel which is included elsewhere on Schedules B and C will be identified as shown, but will not be entered in the "Man-Years" column as this would result in duplication.

d. SCHEDULE D - Cost-Type Contract Workload and Costs Audited.

(1) Amounts reported in Section I will be exclusive of fixed fee. Duplicate reporting of costs audited should be avoided. Where subcontract costs and other costs are audited by an audit installation other than the installation having audit cognizance over the prime contract, appropriate eliminations should be made.

(2) In Section II, with the exception of lines i. and j., the amounts reported in the column "Estimated Cost (Less Fee)" should be the total estimated cost exclusive of fee of the contracts reported in the "Number of Contracts" column. Opposite line i., report the estimated amount of costs remaining to be audited under the contracts on hand at the end of the period. Thus line h. will show the total estimated costs pertaining to contracts on hand and line i. will show the portion of the estimated total costs which remain to be audited. Opposite line j. report the number of different contractors holding contracts at the end of the period.

e. SCHEDULE E - Fixed-Price and Special Audit Assignments.

(1) This schedule is designed to show the workload and work accomplished on fixed-price contract audits and special audit assignments, including pertinent information on completed assignments.

(2) Under "Type of Audit" are listed categories of audit work common to all three audit agencies. In addition to those listed, each agency should show separately the other major categories used in classifying assignments. The "Other" category will cover minor miscellaneous assignments which are not included elsewhere.

(3) Report in column (1) the number of individual audits or assignments completed. Report in column (2) the dollar amounts of costs audited, which ordinarily will be the amount of the contractor's cost statement, proposal, or presentation. In the case of price redeterminations, it will be the costs shown to the price redetermination point. Dollar amounts with respect to "Overhead Rate Studies" and "System Surveys" are either not applicable or have no significance; therefore, the amount column opposite these items has been crossed out. Similarly for other categories where costs audited are not a factor, or where there is no relationship between costs involved and audit coverage or effort, the amount may be omitted. In column (3) - "Direct Man-Years" - report the direct time expended on completed assignments of the various categories. Direct time is meant to include audit, first review, and report typing time. In column (4) report the estimated savings resulting from the completed audit assignments. It is realized that savings are difficult to measure

and that each audit agency applies somewhat different techniques in estimating savings. Therefore, until such time as a standard procedure for estimating savings can be worked out, each audit agency should show savings as developed by their method of computation, with a footnote explaining in general what that method is.

(4) The number of audit assignments in process at the end of the period will be reported in column (5). The number of audit assignments (and potential audit assignments) on hand but not started at the end of the period will be reported in column (6). This will include audits expected to arise from contracts and advance requests on hand.

f. SCHEDULE F - Analysis of Audits of Price Redetermination and Incentive Type Contracts.

(1) Section I provides for a detailed analysis of reports of audit issued during the period on price redetermination and incentive type contracts. Section II shows the disposition of price redetermination and incentive type contracts which were dropped from workload during the period.

(2) Explanation of Section I column headings follows:

Number - Number of audits.

Amount - Dollar amount of costs audited (as defined in IVe(3) preceding).

Direct Man-Years - Direct time expended on the audits (as defined in IVe(3) preceding).

Costs Questioned - Costs questioned as set out in the audit reports. If distinction is made between costs recommended for nonacceptance and costs recommended for further consideration, the amounts should be shown separately. If no distinction is made, then costs questioned may be reported in total.

Savings (after negotiation) - Information as to the negotiated price or settlement is usually available to the audit agencies in the form of the minutes of the negotiation proceedings or the contract amendment reflecting the negotiation results. A systematic procedure whereby the negotiation results are compared with the auditor's recommendations would make this information available. As the negotiation results usually are not available until several weeks after the audit reports are issued, requiring this information on the audit reports issued during the year would hold up the preparation of Schedule F an unreasonable length of time. Therefore, this information is only requested in total opposite line item

"Comparison of audit recommendations with negotiation results." Further explanation of what is to be reported on this line is given in paragraph IVf(5) below.

(3) Audit reports completed and issued during the fiscal year being reported on will be broken down into size categories as indicated. Classification of individual audits by size will be based upon the costs audited.

(4) Opposite number of contractors report the number of different contractors involved in the audits performed. Independent or quasi-independent divisions or plants of the same company should be reported as separate contractors.

(5) On the line "Comparison of Audit Recommendations with Negotiation Results" include those audit reports which were compared with the negotiation results during the year regardless of whether or not the report was issued during the year. The determining factor for reports to be included on this line will be the fiscal year in which the negotiation results were received and the comparison made; not the fiscal year in which the report was issued.

(6) In Section II will be reported the price redetermination and incentive type contracts dropped from workload during the period - in detail for each type of contract as follows:

Contracts audited - field audit.
Report here the number of contracts audited (field audit) and the amount of costs audited.

Contracts - office review of cost statement - no field audit. Report here the number of contracts where field audit was waived but an office review of cost data was made. Under "Amount" report the amount of the cost statement, proposal, or presentation reviewed.

Contracts - audit waived.
Report here the number of contracts where field audit was waived and no office review of cost data was made. Under "Amount" report the estimated amount subject to audit, had audit been made.

V. REPORT CONTROL SYMBOL

Report Control Symbol DD-Comp(A)165 has been assigned to the reporting requirements of this instruction.

APPENDIX III

APPENDIX III

REGULATIONS

COVERING THE OPERATION OF MANAGEMENT FUNDS OF THE DEPARTMENT OF DEFENSE

1. Statutory establishment of management funds

(a) Section 406 of the National Security Act Amendments of 1949 established a management fund for each of the three military departments of the Department of Defense and authorizes their use in financing certain transactions. The corpus of each fund is $1,000,000.

(b) The General Accounting Office has established the following Treasury accounts for the three management funds:

SYMBOL	NAME
1701990	Navy Management Fund, 1950
2103990	Army Management Fund, 1950
5704990	Air Force Management Fund, 1950

New accounts, bearing identical titles and appropriate yearly designations, will be established for each new fiscal year. The corpus of each fund will be transferred annually to the new fiscal year account.

2. Authority for regulations concerning the operations of the management funds

(a) Section 406 of the National Security Act Amendments of 1949 provides as follows:

(1) Accounts for the individual operations to be financed under the respective management funds shall be established with the approval of the Secretary of Defense.

(2) Expenditures may be made from said management funds under such regulations as may be prescribed by the Secretary of Defense (subject to certain specified and other legal limitations).

(b) These regulations cover the method of establishment of projects to be financed through the management fund and the financial and accounting procedures for the fund.

3. Purposes of management funds

(a) It is the purpose of each departmental management fund to provide a means for simplifying administration of, and bookkeeping for, financial transactions of either a continuing or a one-time project to be financed by two or more appropriations, where the expenditures are not readily allocable to such appropriations initially.

MGMT FUNDS

(b) The management fund shall not be used to finance operations of industrial or commercial type, or purchase of supplies, materials, and

equipment for stock, although the fund shall be used to finance purchases of such supplies, materials, and equipment for use of the projects operated under the fund as provided for in the appropriations supporting the projects.

(c) Projects of the type authorized may be managed and operated by one department under its management fund when two or more departments or other agencies of the Department of Defense are participating, as well as when only organizational subdivisions of one department participate.

4. Requirements for the approval of specific projects

(a) Subject to these regulations and to the authority, direction, and control of the Secretary of Defense as provided by law, the Comptroller of the Department of Defense is hereby authorized to approve specific projects and to issue all necessary instructions implementing these regulations.

(b) As a basis for the approval of each specific project by the Comptroller of the Department of Defense, there shall be submitted by the head of the military department responsible for the project a proposed directive in three copies, setting forth the following:

(1) Description and explanation of nature and purposes of project, and how and by whom it shall be managed and operated;

(2) Organizational subdivisions to participate in the proposed project;

(3) Estimated total expenditures to be made in case of one-time projects, or estimated obligations per month and for remainder of fiscal year in case of continuing projects with allocation of respective amounts to appropriations and project account classifications from which they are to be financed; 1/

(4) Any appropriation limitations and any administrative limitations to be placed upon character and amount of expenditures (see section 7); 1/

(5) Basis for allocation of expenditures to respective appropriations and project account classifications thereunder (see section 8);

1/ These estimates and related limitations shall be firm commitments as to availability of funds for use by the managing agency in programming. These approved estimates, restrictions, and outline of scope of operations, when approved, shall have the effect of establishing program limitations similar to appropriations. The scope of operations and dollar limitations shall not be exceeded in current programming without submission of proposed changes for approval in the same manner as a new project.

(6) Basis of financing the management fund project account; i.e., (a) by allotments or (b) by cash advances (see section 5);

(7) Classification of expenditure accounts to be used in project accounting (see section 6);

(8) Any specific exceptions desired in the manner of financial operation of the project from the procedures prescribed in these regulations.

(c) Wherever another department or agency shares any proposed project managed by the department making the application for approval, the concurrence of that department in the proposal shall be included in the application.

(d) The Bureau of the Budget and the General Accounting Office shall be furnished a copy of each approved application.

5. Project accounts under departmental management funds

(a) Under each departmental management fund, a separate administrative account shall be carried for each specific project.

(b) A project account may be financed by either of two methods, whichever may be approved by the Comptroller of the Department of Defense, as follows:

(1) By allotments from the appropriations of the department(s) whose organizational subdivisions participate in the project;

(2) By cash advances from such appropriations in lieu of allotments.

The first method may ultimately be adopted as the sole method for financing projects when procedures for its use have been adequately established. Certain separate rules for the use of each method are embodied in Sections 9 and 10, respectively. Otherwise the rules for the use of both, as set forth hereinafter, are the same.

6. Control of expenditures by manager of project

Regardless of the method for financing a project, the managing agency shall make its own allotment(s) under each management fund project account and the applicable limitations, if any. These allotments will serve as a means of control over actual obligations and expenditures of the project. The issuance of these allotments, the incurring of obligations, the expenditure of funds, and the accounting therefor, including reporting, shall conform to the existing policies and procedures of the performing department. However, an appropriate classification of expenditures under each allotment shall be required.

7. Restrictions on obligations and expenditures

(a) In addition to general restrictions on expenditures, Section 406 of the National Security Act Amendments of 1949 establishes the following restrictions:

(1) Purchases of materials for stock may not be made. However, purchases of materials, supplies, and equipment, including purchases from a working capital fund, may be made for use of the projects operated under the management fund as provided for in the appropriations supporting the respective projects.

(2) No obligation may be incurred against a management fund project which is not properly chargeable to available funds under appropriations for the benefit of which such project was established.

(b) In addition to statutory restrictions against expenditures of any specific project, it may be desirable in some instances to make specific administrative restrictions or limitations on the character or amounts of specific types of expenditures.

(c) An understanding exists with the Bureau of the Budget that the Bureau may examine the amounts to be allotted or advanced for the account of any major project to be financed through the management fund, as a basis for making apportionments of appropriations supporting such projects. In submitting the regular supporting appropriations for apportionment, in the case of continuing management fund projects a separate schedule shall be submitted indicating the sources of funds for such projects.

8. Allocation of expenditures to appropriations

(a) The aggregate actual obligations incurred and expenditures in each project account shall be allocated to the appropriations (by their underlying project account classifications) benefiting from the project in a manner to be prescribed when the project account is established.

(b) Whenever feasible, such allocations of obligations and expenditures shall be made upon an objective, factual basis. Whenever it is not feasible to allocate on an objective, factual basis, obligations and expenditures shall be allocated on a stipulated basis.

9. Special rules for financing project accounts under method of making allotments to project manager

(a) The managing agency for each project will request and receive allotments as required through the Comptroller of that department. These requests for allotments will be in accordance with the approved program for the project. In the case of major projects, the allotments will be requested on a quarterly basis. Pursuant to such request, the Comptroller

of the military department in due time shall make allotments available for the project from the appropriations of that department, and in the case of projects participated in by other military departments he will request and obtain similar allotments from the appropriations of such other departments. All allotments shall be separately maintained in the issuing departments; obligations and expenditures thereagainst shall be controlled and recorded in the manner hereinafter specified.

(b) The managing agency for each project shall prepare periodic estimates (budgets) for obligations to be incurred. These budgets shall be prepared monthly for all major projects, but less frequently for minor projects in accordance with the periods for which allotments are made. These budget estimates shall be kept within the approved programs and supporting allotments granted by the participating activities. Copies of the monthly budgets for each major project, showing also the estimated amount to be chargeable to each of the participating activities for the ensuing month, shall be furnished to each of the participating activities or departments for use in recording obligations in their respective appropriation and allotment accounts equal in amount to their estimated share of the projected obligations, in order that such accounts may show currently a reasonable estimate of obligations which otherwise would not be recorded promptly.

(c) Immediately after the end of each month the managing agency of each major project shall prepare a statement of obligations actually incurred and expenditures for the month, with a summary of amounts chargeable to each participating activity and appropriation. Such statements, together with budget data for the next month, shall be furnished to each of the participating activities and to the Finance Service of each of the departments or agencies whose appropriations are affected, for their use in recording obligations and in reconciling recorded expenditures. In the case of minor projects, such statements may be prepared less frequently, but in no case less often than the period for which allotments are made.

(d) The Finance Service of the department whose management fund is used for each project shall prepare and process transfer-and-counter warrants in the usual manner in order to distribute the monthly expenditures of the management fund to the participating appropriations. 1/ The managing agency of each project shall be responsible for reconciling expenditures of each project so distributed by the Finance Service with expenditures shown by its records.

1/ Since the adjustments between the Accounts of Advances and the Management Funds, through the medium of transfer-and-counter warrants, do not involve an expenditure of money from the Treasury but only adjust the condition of accounts, it is understood the Treasury Department does not interpose objection to this procedure, notwithstanding the fact that the balances in the Management Fund accounts, in order to show their true condition, may reflect charges to those accounts in excess of credits, and, therefore, the warrants will be posted currently on the books of the Treasury.

10. Special rules for financing project accounts by cash advances

(a) When it is provided that cash advances to a project account shall be made from the appropriations concerned, the amount of the advance from each appropriation shall be based upon estimates of obligations chargeable to that appropriation, taking into consideration the period for which expenditures are to be financed. For every major project, the period to be financed shall be limited to the following quarter; for any other project, the entire life of the project may be financed initially, provided it is within the current fiscal year. Advances of funds will be made by check through the use of Standard Form 1080, in the usual manner.

(b) Any excess of advances over expenditures, when ascertained, shall be returned by check to the account of appropriations from which the advances were made through the use of Standard Form 1080.

(c) Immediately after the end of each month the managing agency of each major project shall prepare a statement of obligations actually incurred and expenditures for the month, with a summary of amounts chargeable to each participating activity and appropriation. A copy of each of these statements shall be furnished to each of the participating activities. In the case of minor projects, such statements may be prepared and furnished to the participating activities less frequently, but in no case less often than the period for which cash advances are made to finance the project.

11. Reporting requirements

(a) Each department shall report monthly to the Department of Defense a summary of the financial status of its management fund.

(b) The transactions and balances of the management fund will be reported in Form 3 of each department on two lines: one for those projects financed by cash advances, and the second for those financed through allotments. All transactions will be reported in total; the total transactions for those projects financed through allotments will be shown on the second line, but will not be included in the grand totals on Form 3 inasmuch as the amounts are also reported for the underlying appropriations.

(not exceeding one year) as provided in ended pursuant to regulations.

r advances or reimbursements made by be current period.

(Allotments) No cash balance at end of report period ection 1 - ill be reported in Section 1, because no cash advances will be ade under the allotment method and total cumulative expenditures f such projects will be distributed to underlying appropriations eported in Form 8.

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
WASHINGTON 25, D. C.

OMPTROLLER

8 April 1955

MEMORANDUM FOR THE DEPUTY SECRETARY OF DEFENSE
THE ASSISTANT SECRETARIES OF DEFENSE
THE GENERAL COUNSEL
THE SPECIAL ASSISTANTS TO THE SECRETARY OF DEFENSE
THE UNDER SECRETARY OF THE ARMY
THE UNDER SECRETARY OF THE NAVY
THE UNDER SECRETARY OF THE AIR FORCE
THE JOINT CHIEFS OF STAFF

SUBJECT: Index of Approved Office of the Secretary of Defense Reporting Requirements as of 31 March 1955

Attached for your information is a listing arranged by the organization with primary concern in the related subject-matter area (usually the prescribing organization), of recurring and certain one-time reporting requirements approved under Department of Defense Report Control Symbols.

The listing is arranged as follows:

Part I - Recurring Reporting Requirements Active as of 31 March 1955

Part II - Recurring Reporting Requirements and/or Report Control Symbols Cancelled 1 January - 31 March 1955

Part III - One-Time (Non-Recurring) Reporting Requirements Approved 1 January - 31 March 1955

Detailed descriptions of the individual reporting requirements listed are not provided; however, in most instances titles are shown and indicate the subject matter involved. In all cases where security appeared to be a factor, titles have been omitted.

Proposed new reporting requirements - both recurring and one-time, and revisions of existing recurring reporting requirements - (other than those originating in the Military Departments) should, in accordance with Department of Defense Directive No. 7750.1, be submitted to this office for review and assignment of appropriate report control symbols when approved. Information regarding the submission and review of proposed

RPTS

new, or revision of existing, reporting requirements and additional information concerning a particular reporting requirement listed may be obtained from Report and Form Standards Branch, Room 3C-868, Extension 77751 or 78363.

Attention is again invited to the desirability of reducing the OSD prescribed reporting workload to the minimum necessary for essential operations. Reporting requirements listed in this Index should be reviewed, therefore, by the requiring OSD organization to insure that reporting requirements which, either in whole or in part, are no longer essential are cancelled promptly.

Office of the Secretary of Defense

INDEX OF APPROVED REPORTING REQUIREMENTS
AS OF 31 March 1955 1/

PART I - RECURRING REPORTING REQUIREMENTS

RCSymbol Form Number	Title of Report	Directive
The Secretary of Defense		
DD-SD(SA)5 No Form	Report of the Department of Defense	P.L.216, 81st Congress, Sec.5; memo 29 Dec 1949 to Military Depts from Dir.,OPRS
DD-SD(A)105 No Form	Personnel Distribution by Installation or Activity and by State	DD Directive 7730.1, 30 June 1953, amended 1 Oct 1953
DD-SD(AR)170 No Form	Administrative Control of Appropriations Within the DOD	DD Directive Transmittal 54-86, 12 Aug 1954 to DD Directive 7200.1, 20 Mar 1952
DD-PRSD(Q)71R1 No Form	U.S.Tank Inventories and Requirements (Army and USMC)	DD Directive 4255.1, 14 Jan 1953, amended 4 May and 24 July 1953
DD-PRSD(AR)73 No Form	Tank Allocations Report (Army)	DO
DD-PRSD(M)74 No Form	Tank Shipments Report (Army)	DO
Assistant Secretary of Defense (Comptroller)		
DD-Comp(Q)131 No Form	Achievements in Implementing Title IV of the National Security Act	Memo 17 Feb 1954 to Military Depts from ASD(Comp)
DD-Comp(M)139 No Form	Operating and Occupied Beds in Cont. U.S. Medical Facilities	DD Instruction 6015.9, 8 March 1954
DD-Comp(A)149 No Form	Accounting, Control and Reporting of DOD Appropriation Limitations	DD Instruction 7200.2, 28 April 1954
DD-Comp(A)165 No Form	Summary Report of Audit Operations	DD Instruction 7600.1, 24 June 1954
DD-Comp(SA)166 No Form	Military Air Transport Service	Memo 23 June 1954 to Dir. of Statistical Services, DCS(Comp), USAF, from Dir., PRSD; DD Directive 5160.2, 25 June 1952, amended 11 Aug 1952

1/ The frequency of reporting under the requirements shown is indicated by the letter(s) which appears in parenthesis as part of each report control symbol, as for example:

(A) Annually
(AR) As Required
(BM) Bi-monthly
(BW) Bi-weekly
(D) Daily
(Ei) A series of eight reports only
(Fo) A series of four reports only
(M) Monthly
(OT) One Time
(Q) Quarterly
(SA) Semi-annually
(Si) A series of six reports only
(SM) Semi-monthly
(TA) Tri-annually
(Th) A series of three reports only
(Tw) A series of two reports only
(W) Weekly

DD-Comp(SA)167 R1 No Form	Forecast of DD Expenditures Entering the International Balance of Payments	DD Instruction 7360.1, 25 June 1954 amended 14 Dec 1954
DD-Comp(Q)168R1 DD-800	Sales and Expenditures in Foreign Countries Pertaining to Nonappropriated Funds and Activities	DD Instruction 7360.2, 25 June 1954 amended 14 Dec 1954
DD-Comp(M)171 DD-736	Status of Funds by Budget Category	DD Instruction 7250.4, 11 Aug 1954
DD-Comp(A)172 No Form	Hospital Report of Costs and Operating Statistics	Memos 23 July 1954 to Military Depts from Dir., PRSD; Memo 5 April 1954 to Dept. of the Army from Dir., PRSD; memo 16 July 1953 to Military Depts from Dir., PRSD; memo 13 Oct 1952 to Dept. of the Navy from Dir., OPRS; memo 29 July 1952 to Military Depts from Dir., OPRS; memo 20 July 1951 to Military Depts from Dir., OPRS
DD-Comp(SA)174 DD-685	DOD Financed Production Expansion Projects	DD Instruction 4000.14, 20 Aug 1954
DD-Comp(Q)183 No Form	Accounting and Reporting on Proceeds from Sale of Scrap and Salvage Materials	Memo 9 Nov 1954 to Military Depts from Acting Deputy Comp. (Budget)
DD-Comp(Q)188 No Form	Accounting, Control and Reporting on Special Limitations "Expenses for Public Information and Public Relations Activities"	DD Instruction 7210.1, 22 Dec 1954
DD-Comp(M)193 No Form (formerly DD-Comp(M)161)	Out-Patient Activities, Medical Treatment Facilities	DD Instruction 6015.10, 1 Feb 1955
DD-OC(M)3 DD-329	Status of the Management Fund	Regulations 27 June 1950 recommended by Comp. and approved by SecDef.
DD-OC(M)8 DD-348	Foreign Currency Transactions	Memo 23 May 1950 to Military Depts from Comp.
DD-OC(M)42 DD-617	Fiscal Reporting in Connection with Advance Payments	DD Directive 7830.2, 3 Jan 1952
DD-OC(Q)62 No Form	Support of Certain NATO Military Activities	DD Directive 2010.1, 12 Sept 1952, amended 18 Feb 1955
DD-OC(A)75 No Form	Imprest Fund Shortages	DD Directive 7280.1, 7 Jan 1953
DD-OC(M)79 DD-690	Analysis of Appropriation Status by Activity and/or Project	DD Instruction 7220.5, 5 Jan 1955; DD Instruction 7220.4, 7 Oct 1954; DD Directive 7250.3, 3 Feb 1953
DD-OC(M)89 No Form	Summary Analysis of Reimbursement Collections by Activity and/or Project	DD Directive 7230.2, 6 Aug 1953
DD-OC(SA)91 No Form	Claims Paid Due to Correction of Military and Naval Records	DD Directive 5515.2, 2 Sept 1953
DD-OC(M)111 No Form	Deutsche Mark Support	Memo 30 Oct 1953 to Military Depts from ASD(Comp)
DD-AO(M)5R2 No Form	Claims - Status of Funds FY ___	Memos 17 Nov 1953 and 11 Aug 1952 to Military Depts from Deputy Comp.(Budget); memo 31 Aug 1950 to Military Depts from Asst. Comp. for Budget

DD-AO(M)66R1 No Form	Retired Pay	Memos 17 Nov 1953 and 11 Aug 1952 to Military Depts from Deputy Comp. (Budget); memo 27 Feb 1950 to Military Depts from Comptroller.
DD-OAP(M)1 DD-412	Status of Project Orders	DD Directive 7220.1, 24 July 1952
DD-OAP(M)2 DD-484	Fiscal Reports in Connection With Loans Guaranteed Under Sec. 301 of the Def. Prod. Act 1950	Memo 24 May 1951 to Military Depts from ASD(Comp)

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
WASHINGTON 25, D. C.

Comptroller

JAN. 31, 1955

PRELIMINARY STATEMENT

DEPARTMENT OF DEFENSE AUDIT POLICIES
WITH RESPECT TO ORGANIZATION AND MISSION

I. GENERAL

The term internal audit as used in the Department of Defense in its broad sense encompasses both (a) the audit of activities and operations occurring within the Department, and (b) the audit of outside enterprises in connection with contractual matters. For purposes of simplicity in identifying these areas herein, they will be referred to as "internal" audit and "contract" audit respectively.

II. DEFINITIONS

A. Internal Audit.

Internal audit is the independent appraisal activity within an organization for the review of the financial, accounting, and related operations as a basis for protective and constructive service to management. It is a type of control which functions by measuring and evaluating the effectiveness of other types of control. It deals primarily with financial matters but it may also deal incidentally with related matters of an operating nature (excluding military operations).

B. Contract Audit.

Contract audit is the analysis and verification, through review and examination (usually on a selective basis) of systems, controls, accounts, and supporting evidence, of the accuracy and propriety of a contractor's representations regarding costs involved in the performance of a contract. It includes the responsibility for providing advice to procurement personnel on these matters as appropriate.

III. ORGANIZATION

A. Office of Secretary of Defense Level.

Audit functions at this level will be accomplished by a staff, the chief of which will be directly responsible to the Assistant Secretary of Defense (Comptroller).

B. Military Department Level.

AUDIT

[illegible] Moreover, the size, organization structure, and work of these groups should be reviewed regularly by the departmental internal auditors to assure that they are effectively and objectively performing their assigned functions without duplicating the work of the internal auditors.

the Assistant Secretary for Financial Management. In any instance in which that Assistant Secretary is not also designated as Comptroller, this statement is not intended to prohibit the head of the audit organization from reporting concurrently to the Comptroller of the department.

2. Such field offices may be established as will most effectively and economically carry out the mission of the audit organization. The field organization may include resident auditors at installations, contractors' plants, and procurement centers where the volume of audit or procurement liaison work or the need for particularly prompt audit service warrant.

3. No separate audit organizations will be established at any other level. (However, see section IV, paragraph D.)

IV. MISSION

A. General.

1. Internal Audit.

Internal auditing is a staff function which, to operate effectively, must be completely independent of line operations. The internal auditor's responsibility is to observe, review, appraise, evaluate, and examine financial and accounting policies, systems, and procedures, and performance thereunder, respecting all resources and operations (including reporting) for the purpose of reporting findings and recommendations for corrective action to management. The existence of an internal audit staff in no way relieves other personnel of duties and responsibilities assigned to them. Full responsibility is vested in the operating groups for proper protection and use of the assets of the organization; for compliance with policies, procedures, and objectives; and for the accuracy, propriety, legality, and reliability of their actions.

The internal auditor does not have the authority to make changes, or order changes made, in the procedures or operations of the activities audited. The internal auditor is not responsible for developing systems, methods and procedures, nor for the performance of duties constituting a part of regular line operations. Such responsibilities would tend to give him a biased viewpoint when, in the course of his audits, he would be required to appraise his own work. The auditor, based upon his independent examinations, reviews, and appraisals, provides an advisory service and makes recommendations to management for improvements in existing organizations and systems, and for the correction of deficiencies. It is the responsibility of management to determine what action will be taken and to give the required corrective orders. This, however, does not relieve the internal auditor of the responsibility for following up on his recommendations to determine whether they were given adequate consideration and that management's orders to accomplish changes and correct deficiencies were effectuated.

2. Contract Audit.

The status of the contract auditor within the Department [illegible] It is the responsibility of the contract auditor to provide technical advice and assistance on accounting and financial matters in the negotiation, repricing, and settlement of contracts; and to make recommendations concerning the allowability of costs claimed under cost-type

contracts, the adequacy of contractors' accounting systems and internal controls, the accuracy and reliability of contractors' cost representations and property reports, and the adequacy of contractual provisions of a financial nature.

To assure uniform cost interpretations, efficient administration, and objective reporting, the function of contract auditing is placed under central direction and control independent of personnel responsible for procurement functions.

B. Office of Secretary of Defense Level.

The audit staff at this level, under the authority, direction, and control of the Assistant Secretary of Defense (Comptroller), will assist him in providing policy direction, and will coordinate the audit activities of the military departments and furnish audit service as appropriate at the Secretary of Defense level. Its activities will include: (a) the development of policies and plans with respect to internal and contract auditing; (b) the analysis and evaluation of audit organizations, audit programs, and audit reports prepared by the military departments; (c) the coordination of audit matters within the Department of Defense and with outside agencies such as the General Accounting Office; and (d) the dissemination of audit findings and recommendations to interested elements within the Office of the Secretary of Defense.

Audits will be performed directly by this group only in unusual circumstances. If necessary, staff assistance will be furnished by the military department audit organizations upon request by the Assistant Secretary of Defense (Comptroller). He likewise may request the performance of special audits by the military department audit organizations.

C. Military Department Level.

1. Subject to the authority, direction, and control of the respective Assistant Secretaries for Financial Management, the head of each departmental audit organization will develop and execute plans, policies, and programs necessary to discharge audit responsibilities.

a. Internal Audit -- To accomplish the over-all objective of assisting management at all levels in achieving efficient and economical administration, internal audit activities will include:

(1) Examining and appraising policies, systems, procedures, and records relating to budgeting, accounting, financial or business transactions, and matters of a related nature.

(2) Ascertaining the extent of compliance with established policies, procedures, regulations, laws, etc., in these areas.

(3) Ascertaining whether resources are properly accounted for and safeguarded from loss.

accounting and supporting statistical data and reports developed within the department.

(5) Examining and evaluating, from a financial standpoint, procurement and property management policies, procedures, and transactions.

(6) Observing inefficiency and waste in these areas.

(7) Reporting the facts ascertained and making recommendations in connection therewith to appropriate levels of management, including the Office of Secretary of Defense.

b. Contract Audit -- Activities in this area will include:

(1) The examination and appraisal of the accounting systems, books, records, reports, and claims of contractors and subcontractors under proposed, current, completed, or terminated contracts and subcontracts as appropriate.

(2) Providing technical accounting advice and assistance to procuring activities in the negotiation, pricing, administration, and settlement of contracts and subcontracts.

D. Other Levels.

As stated in section IIIB above, no internal or contract audit groups are authorized to be established (independent of the central audit organization) at any echelon below the departmental level. However, loose usage of the terms "audit" and "auditing" cover a variety of activities, some of which do not constitute audit or auditing as defined herein and consequently are not intended to be covered by this statement. These are as follows:

1. Administrative examinations or "audits" of transactions, vouchers, etc., which are a part of the regular operations constituting a normal element of internal control.

2. Inspections and investigations performed by Inspector General personnel in accordance with their normally assigned responsibilities. However, close coordination should be maintained between the audit and inspection organizations to exchange information where appropriate, and to avoid duplication of effort.

3. Audits of nonappropriated fund activities. Regular audits of such activities may be performed by the central audit organization; however, it is preferred that the responsibility for performance of such audits be assigned to commands, subject to the technical supervision and review of the central audit organization.

4. "Trouble-shooters." This policy is not designed to preclude the establishment at other echelons of groups which, while not performing independent or comprehensive audits on the formal basis contemplated for the departmental level, might appear to have some of the same characteristics. Such of these groups as are established should be more in the nature of "trouble-shooters" who will make special analyses in comptroller areas and assist in correcting defi-

overseas, will be carried out by a single central audit organization in each department in order to assure independence and to avoid duplication. The head of each audit organization shall be responsible to
